PNGase F

Source: Recombinant

About PNGase F

Peptide N-glycosidase F (PNGase F) is an endoglycosidase that removes N-linked glycans from glycoproteins. It is used in the quality control of biotechnological products such as monoclonal antibodies (Mabs) and glycosylated proteins.

Specifications

- Molecular weight 36 kDa
- Purity (SDS-PAGE) ≥95%
- Potency 10KU/mL

Storage: +2°C/+8°C up to 12 months
: -20°C up to 24 months

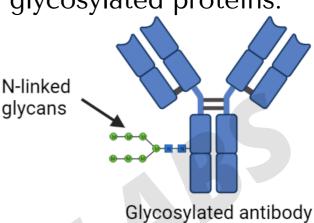

Applications

- Antibody deglycosylation
- Amino acids sequence determination
- X-Ray crystallography

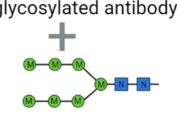

• MOLDI-TOF or other mass spectrometry Deglycosylated antibody

Advantages of Provis PNGase F

- Affordable pricing and faster delivery
- Available in different pack sizes
- Large quantities are available upon request

Glycosylated antibody

Removed N-linked glycans
