EVENFLOCOLOURS.COM

MADE IN USA

MANUFACTURED BY
PERMA BLEND. L U X E

With a new, EU REACH compliant formula, artists can globalize their PMU experience and deliver consistent, healed results. Lulu Siciliano has created yet another essential pigment set for perfectionists like her. Relying on science and testing by top artists, Blonde 2 Brunette was designed as a pre-modified set for zero guesswork. The color palette is appropriate for all Fitzpatrick skin types from 1-6 on the full range of blondes to brunettes to redheads.

Evenflo Colours worked the composition until the organic and inorganic pigments were balanced with the intention for the color to fade to neutral tones. Mixture for use in tattoo or permanent make up. With a higher pigment load and no mixing necessary, use any of the four pigments straight with needle cartridges or with manual devices.

PRODUCT FEATURES

- Higher pigment loaded pre-modified formula.
- Innovative proper hybrid formula.
- Soft & natural effects upon healing.
- Suitable for all Fitzpatrick skin types from 1-6.
- Easy to deposit into the skin.
- Can be used alone or mixed with other pigments.

BOTTLE SIZE: 15ml
