

LAUNDRY SOLUTIONS FOR VETERINARY CLINICS

WASHERS AND DRYERS DESIGNED SPECIFICALLY FOR VETERINARY CLINICS

CONTINENTAL
GIRBAU

LG COMMERCIAL

ECON-O WASH/DRY

BURIED IN LAUNDRY? COMMERCIAL WASHERS AND DRYERS CAN HELP.

Veterinary clinics and hospitals often struggle to keep pace with mounting laundry because their laundry equipment can't handle the influx of soiled bedding, surgical towels and blankets. In order to maintain a healthy environment for animal patients, it's important laundry is properly and promptly cleaned. That way, contaminated laundry doesn't pile up and pose an infection risk to your patients.

Continental, LG and Econ-O commercial washers and dryers are engineered to drastically improve laundry productivity, efficiency and cleanliness. Thus, your veterinary practice completes more laundry in less time — using less labor and energy. And, unlike home-style washers and dryers — like those purchased at big-box stores — Continental, LG and Econ-O commercial washers and dryers are backed by industry-leading commercial warranties and local technical support.

Available in freestanding models for simple installation in unconventional locations, Continental, LG and Econ-O commercial laundry washers and dryers are durably constructed for years of constant use. Operators simply load, select a program and press start!

SPEND MORE TIME DOING YOUR JOB AND LESS TIME DOING LAUNDRY!

“Before laundry was always piling up. It was very unsanitary and a prime area for bacteria to grow. Our Continental Washer has cut more than 20 hours off of our weekly laundry and allowed me to focus on my job.”

- JENNA RESCH
GREAT LAKES VETERINARY CLINIC, NEENAH, WIS.

HIGH-PERFORMANCE WASHER-EXTRACTORS

Continental, LG and Econ-O washers are geared to serve veterinary practices by properly cleaning a variety of items — quickly and efficiently.

FLEXIBLE CONTROLS

Continental washers deliver unmatched cleaning power thanks to advanced programmability. This ensures nasty hazards, like parvovirus and staph, are eliminated using the right combination of water temperature and chemicals. Continental's chemical injection system automatically injects detergents, bleach and softeners into each load, at precisely the right time, water temperature and water level for optimum efficiency and results. Econ-O and LG washer programs are less sophisticated, but still offer programmability for savings in water and energy usage. Operators simply enter a program and press start!

HIGH EXTRACT SPEEDS GET LAUNDRY DONE FASTER

Continental and LG soft-mount washers produce extract speeds up to 414 G-force! Why are higher extract speeds better? As extract speed increases, so does the amount of moisture removed from every load. By eliminating more water, dry time is reduced, which improves laundry productivity and cuts energy usage and related costs. Slash dry time by up to 65 percent and dramatically boost productivity. No more laundry pile-ups!

BECAUSE SPACE MATTERS

Continental (E-Series models), LG and Econ-O-Wash washers are available in freestanding models. They slide into place without reinforced concrete foundations and bolts, so they are simple and less costly to install and relocate. Available in compact designs, Continental and LG small-load washers fit into the same space as most top-load washers, yet offer more than 40 percent greater capacity. Additionally, small-load Continental, LG and Econ-O washers and dryers are available in stacked configurations for optimum use of floor space.

DURABILITY UNMATCHED

Continental, LG and Econ-O-Wash washers are engineered for the rigors of constant commercial use! Continental washers feature AISI stainless steel inner and outer drums, a heavy-duty pump that allows pet hair to pass through the drain, oversized bearings, a quality sealing system and heavy-duty door hinges. Similarly, light-commercial LG and Econ-O-Wash washers offer durable construction and robust doors. All brands are backed by industry-leading manufacturer warranties. Warning: Don't purchase a home-style machine from a big-box store or appliance outlet! Once utilized in a veterinary application, its warranty is null and void.

WATER SAVING FEATURES

Advanced technology on Continental and LG washers allow for superior wash quality using considerably less water than many competitive washers. Both small-load washer brands use just over 13 gallons of water per load and are Energy Star qualified. Continental Washers offer a sump-less design, exclusive AquaFall system and a programmable control for slashed water usage. Less water used equates to less water heated and additional savings in utilities. Meanwhile, top-load Econ-O-Wash Washers use 27.3 gallons of water per load.

“We had frontloads that we purchased from a department store. But they were breaking down left and right. I realized I needed to do something because these front-load washers were not really commercial grade. They were breaking down and hurting our efficiency. I called the Community Pet Hospital and received raving reviews about the E-Series Washer. They slid into place, and if for some reason we remodel the facility, they will be easy to relocate.”

WHEAT RIDGE ANIMAL HOSPITAL,
WHEAT RIDGE, COLO.

HIGH-PERFORMANCE DRYING TUMBLERS

Engineered for fast, safe and efficient drying, Continental, LG and Econ-O dryers are available in 20- to 85-pound capacity single-pocket models and 20- 30- and 45-pound capacity dual-pocket stacks. The dryers, which feature quality internal components and easy-to-use controls, are engineered to dramatically boost laundry productivity and energy-efficiency.

PROGRAMMABILITY & FLEXIBILITY

Continental, LG and Econ-O dryers bring a range of programmability and control flexibility to veterinary clinics and hospitals. Continental Dryers offer the most programmability with a microprocessor offering multiple programmable cycle types — time-dry, auto-dry or optional moisture sensing drying. Continental's Linen Life Extension (LLE) shuts the dryer off when a load has reached its preset target level of dryness, helping to prevent over drying and fabric damage. LG Commercial Dryers offer four cycle options — Whites & Color, Permanent Press, Delicates or No Heat. LG's intuitive programming allows laundries to manage a variety of functions, including cycle time, drying temperatures, cool-down time and top-offs. Econ-O-Dry dryers feature delicate, permanent press, no heat and normal cycles. A convenient timer enables the user to manually select dry time according to load type and size.

SIMPLE OPERATION & ERGONOMIC

Despite advanced technology, Continental, LG and Econ-O dryers couldn't be easier to use. Once programmed, operators simply select a program number and press start. Oversized doors simplify loading and unloading.

DURABILITY UNMATCHED

Continental and LG drying tumblers are constructed for the rigors of constant use. Continental dryers feature dual motors with overload protection; steel front, side and top panels coated inside and out with electrostatically applied, baked-on paint for superior bonding and corrosion resistance; an all-belt drive system with cast iron pulleys; and permanently sealed bearings for quiet, low-maintenance operation. LG commercial dryers offer a streamlined, modern look, and a robust, stainless chrome door and stainless drum. They are backed by industry-leading commercial factory warranties.

BECAUSE SPACE MATTERS

Pro-Series II Stack60 and SuperStack90 Drying Tumblers pack more capacity and productivity into a smaller footprint. Both models fit easily through a standard door opening, yet deliver 20 percent greater capacity, respectively, when compared to most 50- and 75-pound capacity single-pocket dryers. Continental, LG and Econ-O dryer models are available in 20-pound capacity stack units, as well.

“We are a high-volume hospital and see between 50 to 80 patients a day. We also have a boarding kennel with room for 36 animals. Our problem was that we had an excess of laundry building up and we needed an industrial washer to keep up with the demand — rags, bedding, towels, blankets and stuff totally contaminated by discharge, blood, vomit and diarrhea. The machine takes care of it all.”

- KENNETH SMITH
PUEBLO ANIMAL HOSPITAL, PUEBLO, COLO.

CONTINENTAL GIRBAU INC. & GIRBAU GROUP

Continental Girbau Inc. (Continental) was established in 1995 as the North American subsidiary of the commercial laundry equipment manufacturer, Girbau Group, headquartered in Vic, Spain. Family owned, Girbau employs more than 800 people throughout its corporate headquarters in Vic and 15 subsidiaries throughout the world. It markets its industrial and commercial laundry products to more than 90 countries worldwide.

THE TOTAL LAUNDRY SOLUTION

Continental delivers the total laundry solution to vended, on-premise and industrial laundries throughout North America. As the provider of highly efficient batch tunnel washers, washer-extractors, drying tumblers, feeders, ironers, folders and related machinery, Continental serves the complete laundry production and efficiency needs of virtually any application. Proven durable and reliable, Continental laundry systems are engineered for unrivaled productivity, efficiency and ease of use.

OUR MISSION: YOUR SUCCESS

Continental's mantra — "Our Mission: Your Success" — reflects the company's commitment to its distributors and customers. We offer robust laundry systems backed by unrivaled customer care.

SIZING & CONFIGURATION

Every laundry operation is unique, with a distinctive set of production and efficiency goals. Uniquely, Continental Girbau, LG and Econo laundry products offer the flexibility and programmability to meet any need — boosting production and lowering labor, water and energy usage. Continental's team of experts work closely with facilities to properly size equipment for improved laundry room efficiency and productivity.

FINANCING

Financing allows you to retain full ownership of your business and its assets while helping to preserve your cash, liquidity and revolving lines of credit for emergency use, working capital and other investments. Through CustomSelect Financing, Continental Girbau offers flexible financing and competitive fixed rates to all qualifying applicants.

ENVIRONMENTALLY FRIENDLY

Continental laundry products meet rigorous environmental and safety standards established by the International Organization for Standardization (ISO), including ISO9001 and ISO14001. Ever focused on laundry efficiency, Continental Girbau is a member of the U.S. Green Building Council (USGBC), a 501(c)(3) nonprofit that developed the Leadership in Energy and Environmental Design (LEED) Green Building Rating System.
