### COMPLEMENTARY PRODUCTS

All Silk Oil of Morocco Skincare Range

Size: 200 Grams  
HS: 3307.3000.00  
Diameter: 70mm approx

### EXPIRY DATE/SHELF LIFE

The average shelf life of bath bombs is around six months. ... Though, some people like to store away their fizzies in tight bulk bath bomb containers for extended periods of time. Even if someone did this and saved them for two years, they can still be used, but they won't work as well as fresh ones.

### PACKAGING MATERIAL

Recyclable

## PRODUCT SHEET

### FAQS

**WHAT SIZES ARE AVAILABLE?** 200g

**DO THESE SILK BATH BOMBS CONTAIN SULFATES?** No

**DO THESE SILK BATH BOMBS CONTAIN ARGAN OIL?** Yes, they are manufactured using Cold Pressed Certified Organic Argan Oil

**IS SODIUM LAURYL SULFOACETATE A SULFATE?** Sodium Lauryl Sulfoacetate (SLSA) has a very similar name to one of the most common sulfate ingredients, Sodium Lauryl Sulfate (SLS), so you may be tempted to avoid it. Both ingredients are surfactants that can create bubbles and lather in cleansers, but that is pretty much where the similarity ends. SLS is a cheaper ingredient made in a lab while SLSA is naturally derived from coconut and palm oils, according to Syd Salmon of SLI Beauty. Like Disodium Laureth Sulfosuccinate, the SLSA molecule is too large to penetrate the skin, thus causing less irritation than sulfates.

### KEY INGREDIENTS

**Argania Spinosa Kernel Oil** – (Argania Spinosa Kernel Oil) is obtained from the fruit kernel of the Argan Tree. Rich in Vitamin E, antioxidants, omega-6 and omega-9 essential fatty acids all of which assist in keeping skin nourished and hydrated

**WARNING:** Can cause temporary staining to skin if held. Do Not ingest. Can cause a slippery bath.
