- Handmade in Australia with individual love & attention to detail
- Quality Australian Made fragrances
- High quality non-toxic wax
- Natural lead-free cotton wicks
- Long burning with a medium to strong scent throw
- Available in 9 beautiful fragrances

BENEFITS OF SOY

Soy wax candles, made by hydrogenating the oil of the soybean vegetable, are the preferred base for high quality candles today although many leading brands still use paraffin wax. Soy candles burn clean, produce less black soot or smoke and generally burn up to 50% longer than traditional paraffin wax candles. Coupled with premium fragrance, Silk fragranced natural soy candles create an idyllic ambience in the home or office.

- Soy is natural, non-toxic and biodegradable
- Soy is renewable and sustainable. It's farmed and can be replaced faster than its rate of consumption with no damage to the ecosystem
- Soy burns slower than paraffin wax with up to 50% more burn time
- Soy burns cooler than paraffin and beeswax and is therefore safer – particularly for use around children
- Unlike paraffin, soy wax is water soluble and can be cleaned with hot soapy water if spilled
- Soy is clean burning, meaning it will not stain or blacken home surfaces
