

## Environmental Policy

### Policy

His Boy Elroy will act in the following ways to specifically enhance our environmental performance and management:

- We will actively implement systems, which prevent environmental degradation.
- We will comply fully with all legislative and regulatory environmental requirements of the relative authorities.
- His Boy Elroy will actively minimize the effects of our operations on the environment by reducing or where possible eliminating environmental impacts.
- We will undertake to train and educate our employees in relevant environmental procedures, reducing the risk of environmental incidents and encourage their understanding of the aims and objectives of our policy.
- We will actively undertake to apply our stated environmental standards to our service and continually improve on those standards.
- We will continually monitor our service, equipment and vehicles to ensure that these components of our operations are maintained at the highest environmental standard.
- We will set environmental targets consistent with our policy and review them on an annual basis.
- We will seek to meet the high standards and expectations of the Community at all times and contribute to the spirit of community expectations. His Boy Elroy environmental strategy is to elevate.
- We will envisage fulfilling achievable methods of recycling and reuse, working through introduced schemes of our clients as well as our own recycling policies
- Our environmental policy is to include all of our aims and operational objectives and those of our clients, while applying the principals of quality office installation, warehousing and packaging removal.
- We shall work in conjunction with all our clients in their initiatives and efforts at regulatory systems that benefit the environment and surrounding ecosystems in a partnership towards waste reduction, recycling and greener outcomes.
- We will aim to constantly monitor all advancements in technology in a goal to limit effects on the environment with sustainability our goal.

### Objectives

His Boy Elroy through implementation, training, policy and management shall insure ourselves are up to date with current and future trends with all environmental matters. His Boy Elroy will continue to promote and demonstrate its conscious knowledge and understanding of the need for sustainability and the circular economy within the hospitality sectors. Through this knowledge and practices, cost effective and efficient waste management and carbon footprint targets can be made achievable.
