MUSE

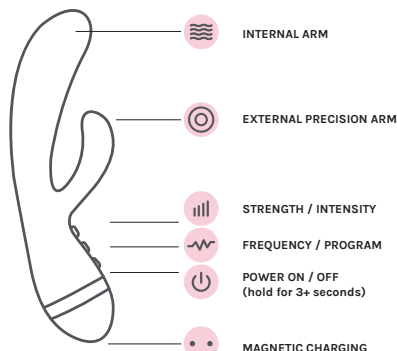

RABBIT VIBRATOR CARE AND INSTRUCTION MANUAL

HEY BABE, COME HERE OFTEN?

Welcome to your self love journey! We're so excited to introduce you to Muse; a rabbit vibrator that will inspire you to make some art in bed.

Muse is a powerful dual stimulation vibrator, perfect for incredible blended orgasms. With an oscillating internal arm that imitates the g-spot + p-spot's favourite 'come hither' motion, and an external head designed for precision pleasure, Muse is a masterpiece. Be inspired by 8 pleasure optimised patterns, and 5 levels of intensity, and get ready to be your own muse.

CHECK ME OUT

YOU'RE IN CHARGE

Before we can get down to the good stuff, your Muse will need to charge for 2 hours.

Insert the main USB plug into any USB port. Connect the charger with the charge port on your Muse (those two fancy silver dots). You'll feel a slight pull and a click, followed by your Muse LED light flashing to let you know it's charging (just above the). Catch up on that show you've been meaning to watch - it won't be long! The LED will stop flashing when your Muse is ready to play.

For best performance, we recommend only charging your Muse with the provided VUSH charger.

TURN ME ON

Charge Muse for 2 hours to reach full charge. Press and hold to turn on. Press to increase intensity level. Press to discover all 8 patterns. Make some magic! Press and hold to turn off.

PLEASURE TO MEET YOU

Settle in, get comfortable, and turn on your Muse. Choose your fave starting pattern + level. Muse is perfect for blended stimulation with the g-spot + clitoris, or the p-spot + perineum.

For clitoral stimulation: Both arms can be used for clitoral stimulation. The small arm is flexible with precision point vibrations, and the larger arm, whilst designed for internal use, can be used for

broader sensations or a gentle back and forth movement on the clitoris.

For g-spot stimulation: The g-spot is an area of nerve endings located along the front wall of the vagina. Everyone's anatomy is different, but the g-spot is usually located about an inch or so inside the vaginal opening on the upper wall. For first time explorers, we recommend some external + clitoral stimulation first before taking the g-spot dive. It's easier to find when you're worked up!

When you're ready to insert, you should be looking for a firm, pressing sensation. Some of the Muse settings include a 'come hither' style oscillation to stimulate the nerve packed area.

For blended g-spot + clitoral stimulation: The flexible external arm can rest on the clitoris whilst the internal arm moves against the g-spot as per the above instructions. This stimulates both the front and back of the clitoris for a powerful blended orgasm.

For p-spot stimulation: The prostate is a gland located just below the bladder in cisgender men and people assigned male at birth. It is roughly the size of a walnut and is located about two inches inside the anus. The internal arm will move against this spot, and the flexible external arm can push back and rest against the perineum to stimulate the prostate from both sides.

If this is someone's first time experimenting anally, we suggest beginning with fingers whilst getting used to the sensation of anal play. Go slowly, and remember that the anus does not self lubricate, so products like Feelin' Myself Intimate Gel are your best friend!

Lubrication: If you'd like extra lubrication for your Muse, you can apply as much as you need to the heads of the toy. It's important to only use water-based lubricants like Vush Feelin' Myself Intimate Gel with your Muse. Other oils, creams, or silicone-based lubricants can damage the high-grade silicone of your toy over time.

GOOD CLEAN FUN

First thing's first: Always clean your Muse thoroughly before and after each use. It's waterproof, so cleaning couldn't be easier. Simply wash Muse with clean warm water and soap, then rinse and pat dry with a lint-free towel or cloth. Ta da!

For those times when you need something quick and discreet (like when your roommate is using the bathroom for karaoke practise), you can also use a gentle wet wipe, like Vush You Do You wipes.

To show your Muse a little more love and care, spritz with Vush Clean Queen to refresh and protect the toy, and store in a Vush Storage Bag to avoid dust build up or damage from other materials, and to keep it safe from sunlight or other extreme heats.

SAFETY FIRST

Muse is for adult use only. Keep out of reach of children. Those who may be pregnant, have a pacemaker, diabetes, phlebitis, thrombosis, or any other condition, should consult with a medical professional regarding the risk of blood clots before using any personal massage product. Do not use on areas that have pre-existing injuries or on swollen skin.

For some, excessive use of vibrating devices can cause temporary numbness and loss of sensitivity. If this happens, take a break and treat yourself to another self love practice. If pain occurs please cease use immediately.

Consult a doctor before use if you have any implanted devices, such as a pacemaker, or if you have had any form of surgery on the relevant body parts. Vush assumes no responsibility for misuse or excessive use of this product. Always switch off after use.

DISPOSAL ADVICE

Dispose of according to your local regulations.

SPECS

PRODUCT SIZE: 200mm x 43mm	POWER INPUT: 5V
MATERIAL: Medical grade silicone/ ABS	BATTERY TYPE: Polymer lithium battery
PRODUCT WEIGHT: 200g	FREQUENCY: 5 levels and 8 patterns
WATERPROOF: IPX7	CHARGE TIME: 120 minutes
NOISE: Less than 50db	USE TIME: 50 minutes
LOW-BATTERY WARNING	MAGNETIC CHARGING

WARRANTY

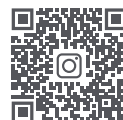

We provide a 1 year customer warranty from when you first purchased your product. After 1 year from your initial purchase we have no obligation to send you replacement items even if previous ones were sent.

We recommend familiarizing yourself with our Terms and Conditions via vushstimulation.com/pages/warranty-refund-policy
