### SANITATION STATUS

As per the survey in Manipur, 53 percent of schools do not have drinking water supply, 70 percent of adolescent girls discontinue their education, 40 percent of schools do not have sanitation facilities (girls and female teaching staff suffer the most) .

#### Key Observations:

- Most of the students, come from humble agricultural background families.
- Students walk 1-2kms every day to reach school.
- They get water supply for one hour every day and they do not have any water storage facility.
- The average number of toilets in government schools is two. In many schools, students and teaching staff share the same toilet.

# Need Analysis - Manipur

SHE team conducted surveys and identified schools in Manipur. In each of the identified schools, new toilets will be installed with provision of water connections and overhead tanks for drinking and sanitation.

S.No.	Name of the School	State	Total School Strength	No of Toilet being Installed	Others
1	POIREI NAWAKON - A children's home for Girls	Achanbingei, Koirengei, Imphal, Manipur	84	3	Water tank construction. A submersible pump to draw water from the water source to the overhead tank.
2	The Selo Junior High School (Bal Vidya Mandir)	Upper Charhazare Kangpokpi Dt Manipur	74	4	Water tank construction. A submersible pump to draw water from the water source to the overhead tank.

## Tripura

### **SANITATION STATUS**

Over the last few years, there has been a sharp decline in enrolment of students in government schools due to poor infrastructure and lack of other facilities.

Some of the schools selected by the Sewa team are located in deep forest regions. The tribal community often vandalise school property as they are against social development. Sewa team is working towards social and economic development of these regions.

Key Observations:

- Most of the students come from neighbouring tribal communities
- Students walk 1-1.5 km every day to school
- Lack of clean drinking water facility and lack of water for sanitation
- Most of the toilets are non-functional or in need of repairs.

# Need Analysis - Tripura

SHE team conducted surveys and identified schools in Tripura.

In each of the identified schools, 4 new toilets will be installed along with provision of water connections and overhead tanks for drinking and sanitation.

S.No.	Name of the School	State	Total School Strength	No of Toilet being Installed	Others
1	Saradadevi Chatrinibas Kumarghat Unakoti	Tripura	55	4	connection to water source. Overhead tank
2	Ratanmoni Shishu Shiksha Niketan Kanchnachera Dhalai	Tripura	25	4	connection to water source. Overhead tank
3	Honjagiri Chatrabas Haripur Gandachera Dhalai District	Tripura	33	4	connection to water source. Overhead tank
4	Vivekananda Shishu Mandir Jumpajala Shipahijala	Tripura	65	4	connection to water source. Overhead tank
5	Ishrir Chatrinibas , Agartala	Tripura	45	4	connection to water source. Overhead tank
