

Cleaning and Maintenance

The unit should be cleaned with a damp soft cloth. A non abrasive cleaning agent may be used for stubborn stains. If your facility allows it, Clorox wipes are quite effective.

Bubble Tube Platform

For optimal results, please read and follow instructions carefully
Please keep for future reference

WARNING: CHOKING HAZARD
Small Parts: Not suitable for children
under 3 years.

3+ years

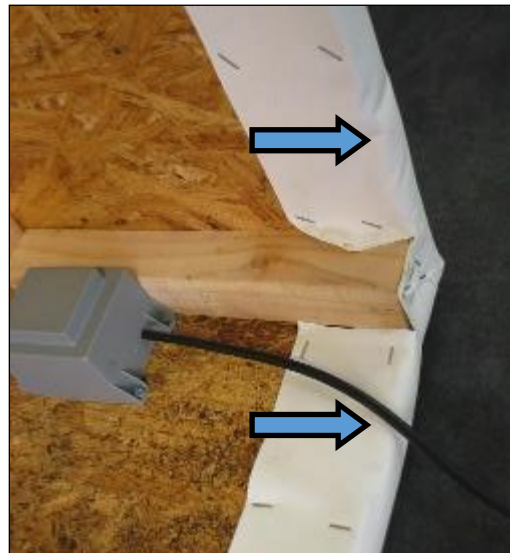

Congratulations on the purchase of your Bubble Tube Platform! The Bubble Tube Platform is a perfect way to safely interact with your Bubble Tube.

Features

- Ergonomic and comfortable design
- Phthalate-free heavy duty vinyl
- Durable and easy to clean
- Port for fiber optic strands (sold separately)
- 1 Year Manufacturers Guarantee

Getting Started

1. Remove the platform from the plastic wrap and set on the floor near the corner where it will be installed.
2. Remove the padded top and the access panel and set to the side.
3. You can choose to mount the bubble tube transformer onto the side of the platform wall, or to simply leave it on the floor inside the platform. If you do not plan on mounting it, skip to step 5.
4. Tilt the platform onto its side. Align the transformer as shown (above, right) with the black cord towards the open end and fasten it to the side with at least two 5/8" screws (not supplied).
5. Approximately 3" from the corner on each side is a "cut out" to allow the power cord to exit the platform without being pinched. Route the black power cord under one of these cut-outs, on the side closest to your electrical outlet, and lay the platform flat on the floor.

6. Move the platform into the corner, keeping the power cord aligned with the cut-out.
7. Gently place the empty bubble tube through the opening, and then align it with the circular cut-out (below, right).
8. Plug the XLR connector from the transformer into your bubble tube. If you have not done so already, remove the protective plastic from the bubble tube column. This will be difficult to do later. **PLEASE READ AND BE FAMILIAR WITH YOUR BUBBLE TUBE INSTRUCTIONS.**
9. Replace the access panel.
10. Lift the padded top (Velcro side facing down) over the bubble tube, aligning the bubble tube with the hole, and slide the pad down to the base.
11. Enjoy!
