

DAKATTA

Discover our different necklace lengths (in)/(cm) with the chart below. Keep in mind everyone is unique, both physically and in aesthetic preferences. Necklace lengths may lay differently depending on your body type.

To determine how one of our necklaces or pendants will wear on you, take a measurement at home using a soft measuring tape. If you do not have a soft measuring tape, you can use a ribbon instead.

First, wrap the ribbon around the base of the neck, and mark the spot where the ends meet (where you'd like the necklace to lay). Then, measure the ribbons length against a yardstick or ruler to determine approximate necklace size based on the chart below.
