

# INGREDIENTS

OUR PRODUCTS EXPOSED.

| INGREDIENT                               | CAS #                  | FUNCTION                          | PURPOSE  |
|--|------------------------|-----------------------------------|--|
| 1,3-Propanediol                          | 504-63-2               | Solvent                           | Able to dissolve other substances  |
| Alcohol Alkoxylate                       | 68154-97-2             | Surfactant-cleaning               | The stuff that cleans  |
| Alkylpolyglucoside                       | 68515-73-1/110615-47-9 | Surfactant                        | The stuff that cleans  |
| Benzalkonium Chloride                    |                        | Biocide                           | Active ingredient providing strong antiseptic activity against both germ positive and negative bacteria                |
| Cationic & Antistatic Nonionic Detergent | 157905-74-3            | Anti-Static                       | Anti-Static Cleaner  |
| Cellulose                                | 9004-62-0              | Viscosity                         | Aids in making the One Soap thick  |
| Cetrimonium Chloride                     |                        | Surfactant                        | Aids in the coverage, feel and evaporation of foaming hand sanitizers  |
| Citric Acid                              | 77-92-9                | Water Softener & Cleaning Agent   | Aids in softening the water & Helps other cleaning ingredients lift soil from fabrics and suspend the soil in the wash |
| Cocamidopropyl Betaine                   | 61789-40-0             | Wetting Agent                     | A naturally-derived surfactant that is sourced from coconut oil.   |
| Cocamidopropylamine Oxide                | 68455-09-9             | Surfactant                        | The stuff that cleans  |
| Cocobetaine                              | 61789-40-0             | Wetting Agent                     | A naturally-derived surfactant that is sourced from coconut oil.   |
| Decyl Glucoside                          | 68515-73-1/110615-47-9 | Plant-Derived Nonionic Surfactant | The stuff that cleans  |
| Decyl Glucoside                          | 58846-77-8             | Emulsifier                        | A mild, cleaner that has great foaming power   |
| Denatured Alcohol                        | 64-17-5                | Drying Agent                      | Aids in drying the clothes quickly   |
| Disodium Metasilicate                    | 6834-92-0              | Corrosion Inhibitor               | A buffering agent, helping in soil anti-redeposition and inhibiting process corrosion                                  |
| Enzyme Blend                             | 9001-92-7              | Odor Control                      | Aids in the cleaning and odor control  |
| Essential Oil                            | Mixture                | Odor Control                      | Pure Essential oil   |
| Ethylhexylglycerin                       | 70445-33-9             | Stabilizer                        | Preservative that aids in the product from separating  |
| Fragrance                                |                        |                                   | See Label  |
| Hydroxyethylcellulose                    | 9004-62-0              | Viscosity                         | Gel thickening emulsifier  |
| Isopropyl Alcohol                        | 67-63-0                | Solvent                           | Aids in removing stains  |
| Lauramine Oxide                          | 1643-20-5              | Wetting Agent                     | A wetting agent lowers surface tension and interfacial tension in (mainly) aqueous solutions                           |
| Laureth-7                                | 9002-92-0              | Surfactant                        | The stuff that cleans  |
| Laureth-7                                | 68002-97-1             | Surfactant                        | The stuff that cleans  |
| Lauryl Alcohol Alkoxylate                | 68439-51-0             | Wetting Agent                     | A wetting agent lowers surface tension and interfacial tension in (mainly) aqueous solutions                           |
| Linear Alcohol Ethoxylate                | 9002-92-0              | Surfactant                        | The stuff that cleans  |
| Methylisothiazolinone                    | 2682-20-4              | Preservative                      | Provides the shelf life to the One Soap  |
| Natural Fragrances *                     | See Website            | Fragrance                         | * Complies with ISO9235  |
| Nonionic Surfactant                      | 68439-51-0             | Emulsifier                        | Allows the liquids to mix  |
| Phenoxyethanol                           | 122-99-6               | Stabilizer                        | Preservative that aids in the shelf life of the product  |
| Polyvinyl Alcohol Polymer                | 25213-24-5             | Film Former                       | This is the Nugget Film (only applies to Laundry & Dishwasher Nuggets)   |
| Protease                                 | 9014-01-1              | Protein Remover                   | Breaks down the starch & proteins of food stains to remove stains from dishes  |
| Purified Water                           | 7732-18-5              | Carrier                           | Able to dissolve other substances  |
| SDA 38b                                  | 64-17-5                | Solvent                           | Able to dissolve other substances  |
| Sodium Carbonate                         | 497-19-8               | Water Softener & Cleaning Agent   | Aids in softening the water & Helps other cleaning ingredients lift soil from fabrics and suspend the soil in the wash |
| Sodium Carbonate Peroxide                | 15630-89-4             | Stain Remover                     | Aids in removing stains  |
| Sodium Chloride                          | 7647-14-5              | Processing Aid                    | Prevents caking & Standardizes product density   |
| Sodium Citrate                           | 1968-04-02             | Complexing Agent                  | Improves cleaning efficiency by inactivating water hardness  |
| Sodium Coco Sulfate                      | 97375-27-4             | Emulsifier                        | The stuff that cleans  |
| Sodium Lauryl Sulfate                    | 151-21-3               | Surfactant                        | The stuff that cleans  |
| Sodium Metasilicate                      | 6834-92-0              | Alkalinity Builder                | Helps to saponify and emulsify grease and oils from the surface  |
| Sodium Oleate                            | 143-19-1               | Foam Control                      | Aids in reducing foam build up while supporting the cleaning of clothes  |
| Sodium Percarbonate                      | 15630-89-4             | Stain Remover                     | Helps to lift stains from dishes   |
| Sodium Silicate                          | 1344-09-8              | Protection Agent                  | Prevents mineral deposits on surfaces after washing by removing water hardness   |
| Sodium Sulfate                           | 7757-82-6              | Processing Aid                    | Prevents caking & Standardizes product density   |
| Sorbitan Ester                           | 9005-64-5              | Emulsifier                        | A mild, cleaner that has great foaming power   |
| Subtilisin                               | 9014-01-1              | Enzyme                            | Aids in stain removal and improves efficiency  |
| Trimonium Chloride                       |                        | Surfactant                        | Anti-Static Agent  |
| Water (Aqua)                             | 7732-18-5              | Carrier                           | Able to dissolve other substances  |
| Xanthan Gum                              | 11138-66-2             | Thickener                         | Thickens the One Soap's consistency  |
