Clenbuterol is an extremely powerful aid to both weight loss and fat burning so it's ideal for a cutting cycle. Often stacked with anabolic steroids, Clenbuterol can provide a huge boost for those looking to get a more ripped appearance, stripping away the fat and shedding excess weight. The active substance, Clenbuterol Hydrochloride, is a drug that belongs to fat-burning means. Although, Clenbuterol has not lost its medicinal properties and is still used not only in sports, but also in medicine. People with chronic breathing disorders such as asthma use this as a bronchodilator to make it easier for them to breathe.

Clenbuterol: Side Effects, Uses, for Weight Loss, and More

Clenbuterol is a compound that belongs to a class of drugs called beta2-agonists. Drugs in this category can cause dilation of the bronchial muscles. Beta2-agonists are often used to treat asthma..
