## Can DHEA Increase Men's Testosterone Levels?

DHEA is an androgen (masculine sex hormone) that is secreted by the adrenal glands, and to a lesser extent, by the testes and the brain. After it is synthesized or taken in supplement form, DHEA acts as a steroid precursor to hormones: It is converted into androstenedione, which is then used to make dihydrotestosterone (DHT) and testosterone. DHEA is also successfully used by men suffering from erectile dysfunction (ED) and low libido because it raises testosterone levels. Enhanced testosterone levels also means an improvement in bone density thereby preventing osteoporosis, increased muscle volume and contour, and decreased body fat, especially around the waist.

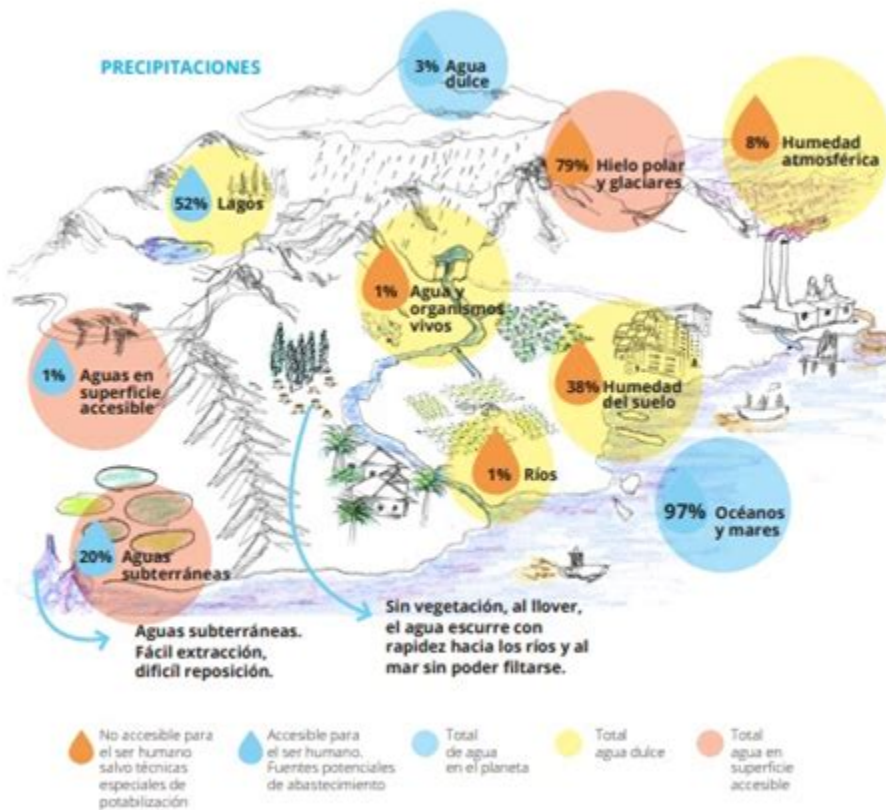

## **DHEA - The Dangerous Testosterone Booster That Doesn't Work**

DHEA helps produce other hormones, including testosterone and estrogen. Natural DHEA levels peak in early adulthood and then slowly fall as you age. A synthetic version of DHEA is available as a tablet, capsule, powder, topical cream and gel. People use DHEA as an anti-aging therapy and to improve physical performance.

DHEA (dehydroepiandrosterone) is a steroid hormone available in supplement form that is sometimes used to increase testosterone levels. Produced naturally by the adrenal glands, DHEA is converted by the body into testosterone and other sex hormones. Johner Images/Hans Berggren/Brand X Pictures/Getty Images [get redirected here](#)

## DHEA for Testosterone - Supplements in Review

DHEA supplements can be made from wild yam or soy. Scientists don't know everything DHEA does. But they do know that it functions as a precursor to male and female sex hormones, including.

## DHEA for Testosterone - Supplements in Review

Does DHEA Increase Testosterone? In Men, No. However, in Women, Maybe DHEA may be an effective testosterone booster but not for the men. Studies show that women were the ones who experienced increased levels of testosterone, dihydrotestosterone, and cortisol when supplementing with DHEA. If you are a woman, don't worry!

Total testosterone and DHEA-S dropped significantly until 24 h after HIIT for both age groups, while free testosterone of DHEA-supplemented middle-aged men remained unaffected. These results demonstrate acute oral DHEA supplementation can elevate free testosterone levels in middle-aged men and prevent it from declining during HIIT. [visit the website](#)
