HOW TO FIND YOUR RING SIZE:

Cut a strip of paper, string, or floss and wrap it around the base of your finger.

Pick the finger on which you'll wear the ring
(e.g. cocktail rings are often worn on the middle or pointer finger).

Ensure the paper is pulled snug to your finger (but not so tight that the ring won't be able to pass over your knuckle).

Mark the spot where the paper meets, and then remove from your finger and measure the distance with a ruler.

Use our chart to determine your ring size. If you are between sizes, size up.
