

LIQUIDTOOL.

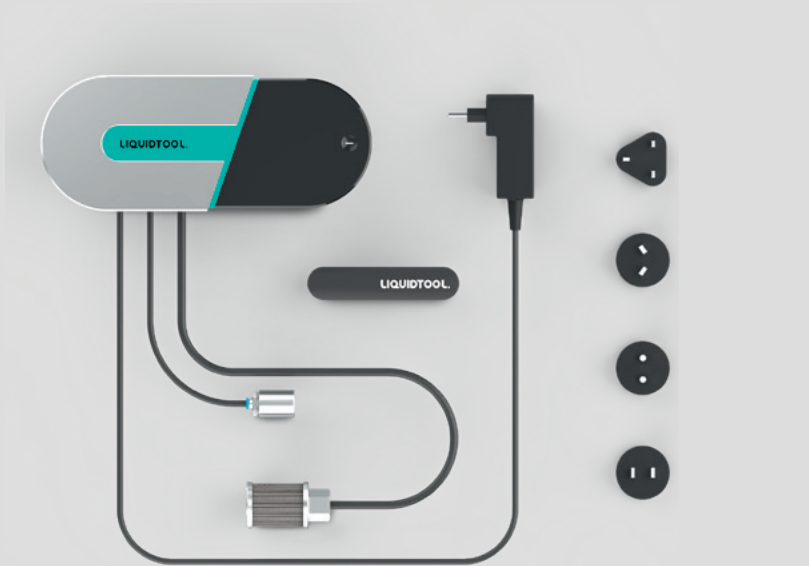

Smart Coolant Management

Give your coolant a voice

The Liquidtool Instructor ensures that the coolant is always under control and will allow you to focus fully on your core tasks.

Thanks to plug & play installation, the system is ready to use in 10 minutes and gives you access to the Liquidtool Manager and the Liquidtool mobile app. The Instructor uses the Liquidtool Sensor 01 as a physical IIoT device.

Smart Coolant Management

The Liquidtool system supports you in coolant management. You are automatically notified if you need to take action.

Complete and reliable data

The Liquidtool Sensor automatically and regularly measures the coolant concentration and temperature. Your data is always up to date.

Full Visibility and Transparency

You can access all your machines from everywhere at anytime with any device. Giving you an overview with total control.

Your advantages with the LIQUIDTOOL Instructor

Reduced coolant consumption

Savings due to correct concentration

Improved skin compatibility

Less rashes on hands

Less foaming

for better lubrication and cooling

No more bad smell

improves working environment in the shopfloor

Longer tool life

for a higher number of pieces per tool

Better corrosion protection

on workpieces and machines

With our simple **plug & play solution**, we accompany our customers into the digital age.

Smart Coolant Management

Book a demo

The Liquidtool Instructor

is the innovative solution for monitoring coolants, which is put into operation via plug & play and monitors the condition of coolants automatically, simple and reliable.
