

WB Pouch

User Manual v1.1

W O M B A T

WB Pouch User Interface

Click any keys here will prompt out a "Macro Dialog",
For example, "W"

Macros

1. By clicking “ **Default** ”, the “ **W** ” key will be set as the initial key value , that is, the letter “ **W** ”
2. Click on the “ **macro** ”, the software will convert to macro recording , as shown on the right
 - ① Press the **Red circle** “ **record** ”, the button will turn into a **Gray square** “ **stop** ”, indicating that the software has now started to record the keys pressed on the keyboard
 - ② At this point, if you press any key on the keyboard , the interface will display the key you just pressed.
 - ③ Pressing a key is composed of two actions: “ **↓ press** ” and “ **↑ release** ” , so you can see the result shown in the figure below.
 - ④ When you finish recording the actions on the keyboard , press the **Gray square** “ **Stop** ” to stop recording
 - ⑤ Then press OK at the bottom to complete the keyboard macro recording

❖ **Remember !** Recorded in the software / action has not been downloaded to the keyboard , you must click “ **Download** ” on the right side of the interface , the software will download the recorded macro to the keyboard for execution , otherwise, once you switch to other editing functions , the recorded macro will be Macros may be lost and need to be redone!!

Macros

3. " **Multimedia** " and " **Shortcut keys** " are some commonly used system operation hotkeys . This software has included some commonly used operation hotkeys for selection.

4. " **Disable** " is to clear the key value. After successful setting, the key will become no code sent.

❖ Click the desired function , press " **OK** " **below** , then return to the main screen and press the " **Download** " button on the right to download it to the keyboard to take effect

5. To call the edited macro on the keyboard , now just press **Fn + the edited key** , such as Fn + " **W** " in this example.
