

CUSTOMER NAME: _____ PHONE: _____ JOB #: _____ INSTALLER: _____

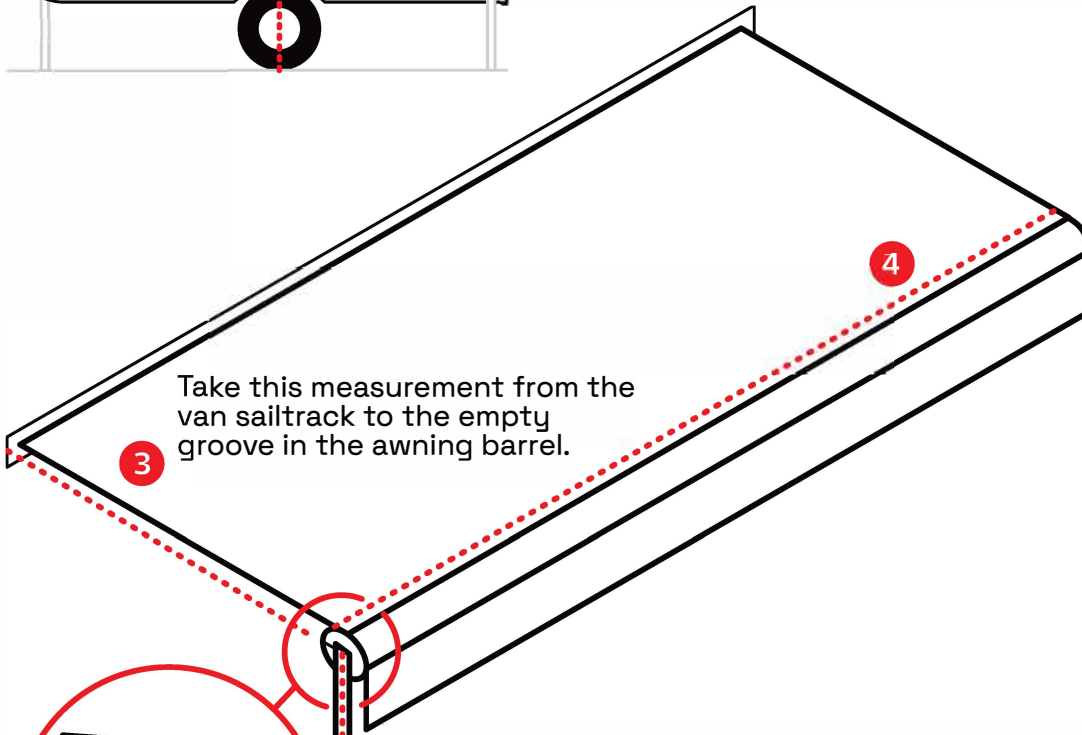

1 Van height. Measure from the ground at the centre of wheel(s) to the bottom of van sail-track.

2 Wall height. The height of the legs when fully extended. Should be approximately 2100mm.

3 Angle. The width of the awning from where the material attaches to the van, to the empty groove in the awning barrel.

4 Vinyl length. The length of the vinyl measured along the barrel.

Take this measurement from the van sailtrack to the empty groove in the awning barrel.

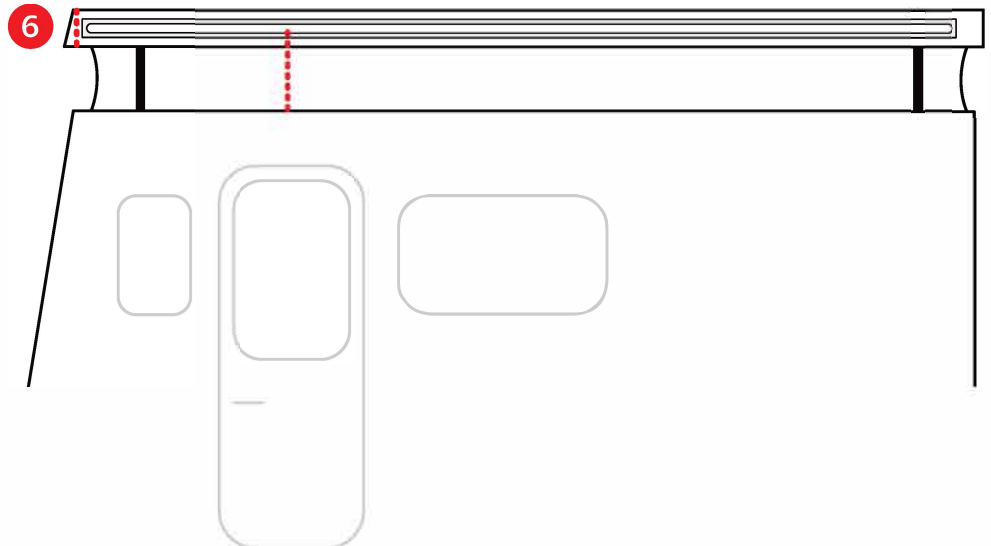

5 Pop-top Infill. This measurement only required on pop-top vans.

6 Pop-top roof. Measure the height of the pop-top roof.

2 Ensure the legs are vertical.

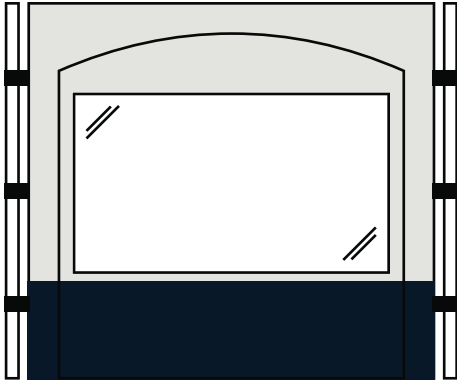

POP-TOPS ONLY

Measure from top of van to middle of sail-track when roof is pop-top is up.

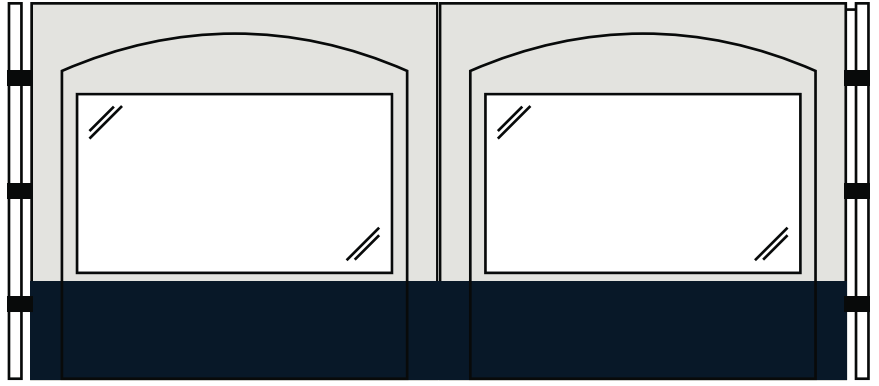

Ensure the groove in the awning barrel is facing 9 o'clock towards the van.
