

## Product Specification

|                   |                                 |
|-------------------|---------------------------------|
| Product Name      | Smart Pet Odor Deodorizer II    |
| Product model     | UJWQ03                          |
| Battery Capacity  | 4000 mAh                        |
| Input Voltage     | DC5V1A                          |
| Product Material  | ABS                             |
| Product Dimension | 3.7" × 3.7" × 1.5" / 94x94x40mm |
| Product Weight    | 0.37lb/0.17kg                   |

## Safety Information

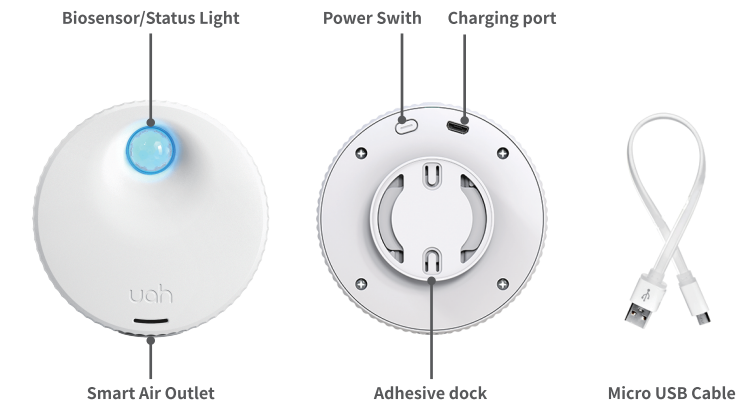

To reduce the risk of fire, electric shock, or other injury, please follow all instructions and safety guidelines.

1. Please stick the pet odor deodorizer on a smooth wall or the wall of cat litter box. Make sure the surface is clean before putting it on.
2. To avoid damage, please do not place anything into the opening on the deodorizer, especially the smart air outlet.
3. Do not allow children to touch or play with the pet odor deodorizer.
4. Do not allow pets to bite the product, since the battery inside will cause danger.
5. Do not get close air outlet, especially mouths and noses to avoid discomfort.

## What are in the Box

- 1 x Smart Pet Odor Deodorizer
- 1 x Micro USB Cable
- 1 x User Manual
- 1 x Adhesive

## Getting to Know Your Pet Odor Deodorizer

#### Steady Blue Light

Intelligent monitoring status Auto off when pet get close/leave.

#### Steady Red Light

Intelligent monitoring status with low power reminder.

#### Blue Light Breathing

Working Status.  
Dispelling odor.

#### Red Light Breathing

Working Status with low power reminder.  
Dispelling odor.

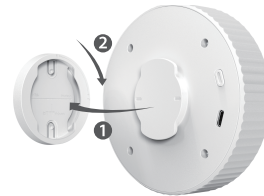

## Use Instruction

### Installation

1. You can stick the Smart Pet Odor Deodorizer on the wall 8 to 16 inches above the pet toilet/cat litter box. Or you can place it inside the cat litter box if there is enough space.
2. How to set it up in place?
  - (1) Use a dry cloth to clean the wall. To avoid stickiness reduction, do not use any detergents to clean the wall.
  - (2) Tear off the film and press adhesive to push out the air.
  - (3) Hold and press it evenly for 10 seconds to ensure it firmly installed.
3. Unscrew the deodorizer and press the power switch to turn it on. Screw it back to the dock and walk away to let it work.

### How to Charge it?

- Hold the deodorizer and unscrew it counterclockwise. Plug the USB cable in and charge it with an adapter (No more than 5V input).
- The blue light will flash when charging. Once it's fully charged, the blue light will be steady on. "Note: the device is default to be off while charging to avoid any ozon emissions."
- Align the buckle with the card slot and rotate clockwise to reset.

## How Does It Work?

The device generates a small amount of ozone and disperses negatively charged ions into the air. These ozone and ions attach to some odor-causing chemicals and particles in the air giving them a negative charge so that the chemicals and particles may attach to nearby surfaces such as walls, or attach to one another and settle out of the air.

### Safety Biosensor

We deeply understand that there are various debates about ozone safety in home applications. In order to minimize any risks to you and your beloved pets, we carefully designed the device to produce an ozone emission concentration far less than 0.050 parts per million, strictly in compliance with the CARB standards (California Code of Regulations, Title 17, § 94800 - § 94810). In addition, our device comes with a smart safety biosensor to further protect you and your pets. When you or your pets are within 3 meters distance to the device, the biosensor works automatically to turn off the ozone generator and ionizer (The Blue Light flashes 3 times and then stay steady). While you are far enough from the device, the biosensor turns on the ozone generator and ionizer (Blue Light Breathing).

### Intelligent battery saving

1. Normal Mode: The deodorizer works 10 minutes with blue light breathing and then 10 minutes' resting & intelligent monitoring with steady blue light. It repeats when nobody is within 3 meters.
2. Safety Protection Mode: When you or your pets are within 3 meters, bio-senor is triggered to turn off the deodorizer. After you leave, it works 15 minutes with blue light breathing and then 10 minutes' resting & intelligent monitoring with steady blue light. After that, it returns to Normal Mode.
