### Handcrafted Premium Teas & Tisanes

A FEW WORDS ABOUT OUR HANDCRAFTED, PREMIUM LOOSE LEAF TEAS...

- Historically, up to 60% of our ingredients are grown at Light of Day farm.
- One pound of loose tea yields approximately 240, 16 oz. cups.
- One ounce of tea yields 15-25 servings, dependent upon taste preference.
- There is a minimum of 50 servings per tea tin.
- Shelf life: Teas are of best flavor if used within 3 years of harvest, but never truly “expire”.
- There will be a lot number on the bottom of each tin, and a “best by” date of ten years from the production date.
- Tea storage: Tea should be stored in an airtight container away from light, heat, and moisture, and from anything with a strong odor. Plastic containers or paper bags are not ideal for storing Tea, as they are not airtight. We recommend storing your tea in their original tins as they provide excellent protection and will keep your tea fresh.
- For Foodservice partners (serving by the cup/pot) discount is a percentage off the products in this [Wholesale Catalogue](#) compared to the prices on our retail website. Discount is 10% off pound bags 1-5, then 15% off orders of 6 pounds or greater. One full pound of our loose leaf Teas yields approximately 240 servings (average cost to your business per 16 ounce cup is just 60 cents!). We encourage new accounts just starting out with our Teas to begin with our 50-serving retail-size tins which you may purchase directly off our website, as we do not discount or resell our retail size tins due to labor-intensity. Once those are close to empty and ready for refilling, you will have gained confidence in our tea program and will be ready to benefit from the applicable discount on our full pound bags. Please inquire about special Co-Brander Terms and Pricing if you are interested in developing a product using our Teas.
