This guideline presents the next subtle step in the evolution of the Heineken® logos. It keeps the brand identity contemporary and progressive, makes Heineken’s most iconic design elements even more powerful, and subtly dials up the authentic roots.

The visual brand identity is rooted in history, and in the iconic green bottle with race-track label.

Let’s first zoom in on green.
Around 1900 Gerard Adriaan Heineken wanted his premium quality beer to stand out from all the usual brown beer bottles. To express the clear, bright, fresh and natural character of his lager beer, he choose for a green bottle. Green became the iconic brand colour of Heineken®. And in this design evolution we use green even in the banner, which used to be black.

Secondly the red star.
The star is a medieval brewers symbol. 4 points represent the natural ingredients: malted barley, water, hops and Heineken’s unique A-Yeast. The 5th was the unknown magic of brewing. Today we don’t rely on magic anymore; we replaced it by craftsmanship. And we still keep the star as our core symbol. In the new logo and label designs the star became again a bit more prominent. Showing the Heineken® quality symbol with more pride and confidence.

And thirdly, we fine-tuned a lot of details: for example the drawing style of the hops, the outlines around the banner, the text EST. 1873 left and right of the star to show the birth-year of the brand, etc.

The logos are of course derived from, and consistent with, the race-track label on our bottle and can. See the separate packaging design guidelines for more label details.

It is of utmost importance that the Heineken® brand is always represented by the correct logos. It is one of the most valuable assets of our company, and world-famous, anchored in millions, or even billions, consumer minds. Always adhere to these guidelines, and in case of doubt, contact the Global Heineken® brand design team in Amsterdam.

NOTE: Never use logo elements in isolation. For example: never use a smiling ‘e’ in isolation, never use the red star in isolation, never use other coloured stars in isolation. It weakens our trade mark protection significantly.
Heineken® has in principle 4 logos: Brand logo, Original lager beer product logo, 0.0 product logo and Light product logo.

The basis of these 4 logos is identical: Heineken® word mark with the red star proudly centered above it, and green as brand identifying colour, except for 0.0. The difference is in the elements around it, which are specific for its usage.

The Heineken® brand logo is the default choice. It provides the most iconic, powerful and universal Heineken® brand recognition. It’s used to express the Heineken® brand and everything it stands for. It’s simple, powerful, draws attention and stands-out from the clutter.

The Heineken® original lager beer logo should be used on items and messages directly related to the beer itself. This logo expresses authenticity, craftsmanship and has a beery look & feel. It’s used for example on glasses, packaging, and to endorse the ‘Stories behind Heineken®’.

The Heineken® 0.0 logo is specifically for items and communication directly related to Heineken® 0.0 lager beer. The logo clearly reads 0.0 and emphasizes the main colour for Heineken® 0.0: blue.

The Heineken® Light logo is specifically for items and communication directly related to Heineken® Light lager beer. The logo clearly reads LIGHT and emphasizes the main colour for Heineken® Light: white.

Each of the 4 logos has its own varieties as needed for specific applications. There are vertical versions, artworks for different background colours, black and white or small replication. See further in the guideline for details.

NOTE: Never use logo elements in isolation. For example: never use a smiling e in isolation, never use the red star in isolation, never use other coloured stars in isolation. It weakens our trade mark protection significantly.
Heineken® brand logo

- Iconic red star with white outline.
- Red points are subtly rounded.
- White outline has uniquely shaped points.
- EST. 1873 refers to the year the brand was born in Amsterdam.

- White Heineken® word mark in the characteristic typeface with smiling e's, plus registered trade mark ®.
- Green background to show the brand's main visual identifier: Heineken® green.
Heineken® brand logo

The Heineken® brand logo

The Heineken® brand logo is the default choice. It provides the most iconic, powerful and universal Heineken® brand recognition. It’s used to express the Heineken® brand and everything it stands for. It’s simple, powerful, draws attention and stands-out from the clutter.

There are 3 versions:
- a horizontal version
- a vertical version
- and for exceptional cases there is a third option, the horizontal logo

Never use the horizontal logo vertically, and never use the vertical logo horizontally.

There are different versions for specific applications:
- reversed out of green (is always preferred), and reversed out of black or grey
- positive on white
- black on white and white on black
- small use in case the logo is less than 35 mm. wide, or is reproduced with a 'rough' printing technique

DO NOT:
- use logo elements in isolation; for example do not use the star in isolation, nor the smiling e or the H
- use the logos on background colors that are strange for the brand (e.g. blue, red, etc).
- Change a Heineken® green area around the logo to isolate the logo from these background colors
- change the composition or colors of the logo in any way.

FOR EXCEPTIONAL USE ONLY

Always keep the indicated clearance area from other elements.

- Small use mono-colour Heineken® LAGER_HORIZONTAL logo, for positive reproduction. Reference: BRAND_HORIZONTAL_2_D_1COLOR

FOR EXCEPTIONAL ITEMS

Heineken® horizontal brand logo Artworks
Heineken® original lager logo

- Iconic red star with white outline.
- Red points are subtly rounded.
- White outline has uniquely shaped points.
- EST. 1873 refers to the year the brand was born in Amsterdam.

- White Heineken® word mark in the characteristic typeface with smiling e's, plus registered trade mark ®.
- Banner in Heineken® dark green refers to an authentic ribbon.
- Silver / aluminium outline, or Cool Grey in regular printing.
- Hops line drawing expresses natural ingredients.
The Heineken® original lager logo

The Heineken® original lager beer logo should be used on items and messages directly related to the beer itself. This logo expresses authenticity, craftsmanship and has a beery look & feel. It’s used a.o. on glasses, packaging, and to endorse the ‘Stories behind Heineken®’.

There is 1 main version:
- a horizontal version
  Never use the horizontal logo vertically.

There are different versions for specific applications:
- reversed out of green (is always preferred), and reversed out of black or grey
- positive on white
- black on white and white on black
- small use in case the logo is less than 35 mm. wide, or is reproduced with a ‘rough’ printing technique

DO NOT:
- use logo elements in isolation; for example do not use the star in isolation, nor the smiling e or the H
- use the logos on background colors that are strange for the brand (e.g. blue, red, etc). Create a Heineken® green area around the logo to isolate the logo from these background colors
- change the composition or colors of the logo in any way.

ALWAYS KEEP THE INDICATED CLEARANCE AREA FROM OTHER ELEMENTS.

**Heineken® 0.0 logo**

- Iconic red star with white outline. On a white background the outline is visualized by means of drop-shadow lines in Cool Gray 4C.
- Red points are subtly rounded.
- Drop-shadow has uniquely shaped points.
- EST. 1873 refers to the year the brand was born in Amsterdam.

- White Heineken® word mark in the characteristic typeface with smiling e’s, plus registered trade mark ®.
- Banner in Pantone 294C refers to an authentic ribbon.
- Silver / aluminium outline, or Cool Grey in regular printing.

- The especially designed word 0.0 clearly shows it’s a 0.0 lager beer.
- Blue (Pantone 294C) is the primary colour. White is the secondary colour to express the 0.0 character of the alcohol free beer.
The Heineken® 0.0 logo

The Heineken® 0.0 logo is specifically for items and communication directly related to Heineken® 0.0 lager beer. The logo clearly reads 0.0 and emphasizes the main colour for Heineken® 0.0: blue (Pantone 294C).

There are 3 versions:
- a standard version
- a vertical version
- and for exceptional cases there is a third option, the horizontal logo

Only use the horizontal version in exceptional cases when the standard version really doesn’t fit because of very limited height.

Never use the horizontal logo vertically, and never use the vertical logo horizontally.

There the different versions for specific applications:
- positive on white; is preferred for 0.0
- reversed out of green, and reversed out of black or grey
- positive on white
- black on white and white on black
- small use in case the logo is less than 35 mm. wide, or is reproduced with a ‘rough’ printing technique

DO NOT:
- use logo elements in isolation; for example do not use the star in isolation, nor the smiling e or the H
- use the logos on background colors that are strange for the brand (e.g. blue, red, etc).
- Create a white area around the logo to isolate the logo from these background colors
- change the composition or colors of the logo in any way
**Heineken® 0.0 logo**

*Use of Heineken® 0.0 Logo on a blue background*

**LEGAL RESTRICTION REGARDING PLACEMENT OF THE RED STAR**

Logoset navigation
How to find the correct Heineken® logo files

Main logoset
The Heineken® logoset consists in the basis of 4 different logos:

Heineken® Brand Logo
Heineken® Original Lager Logo
Heineken® 0.0 Logo
Heineken® Light Logo

Versions
For each logo there is a standard (=1) and small use (=2) version:
Standard is the default choice.
If the logo is reproduced with a width < 35 mm the small logo has to be used. The small logo is also best in case the reproduction technology doesn’t allow much detail: e.g. embroidery, brand-mark, embossing. Exceptional variants: vertical (=3), vertical small (=4), horizontal (=5)

Positive vs Reversed
There are positive artworks for on light backgrounds: e.g. white (=A), and reversed artworks for on dark backgrounds: e.g. Heineken® green (=B) or dark grey / black (=C) or light grey and aluminum/inox (=C1).
1 colour versions are available as black on white: positive (=D), and white on black: reversed (=E).

Colours
There are different colour versions such as: full colour in CMYK (FC), or Pantone colours (PMS).

File extensions
For different techniques there are different file types available, recognizable as file-extensions: ai, eps, jpg, pdf.
