

**Dear customer:** For better user experience, we upgraded the E-bike meter. Please read this manual first when you receive the E-bike product, finish the disassembly and replacement of the upgraded meter according to the operating instructions.

## 1. Dismantling the old meter: It need 6 steps.

1.1 Make sure the power button is off.

1.2 Untie the tangled wire.

1.3 Unplug the meter line's butt connector.

1.4 Find the 3# Hex key wrench on the Toolkit of the E-bike packing box.

1.5 Open the meter clamping screw with 3# Hex key wrench anticlockwise.

1.6 Remove the meter.

## 2. Install the new meter: It need 6 steps.

2.1 Put the meter on the handlebar.

2.2 Tighten the screw with 3# Hex key wrench clockwise.

2.3 Align the arrow symbols on the two butt connectors, plug it.

2.4 Tied up the braking wire and meter wire with tangled wire tightly.

2.5 Turn on the power switch button after completing the above steps.

2.6 Turn on the power switch of the meter, the indicator light on, and the installation is completed.
