INTRODUCTION

Thank you for purchasing Dum Audio's Passive Speakers. Dum Audio's premium equipment delivers precise and clear sound with minimal noise and is easy to set up and operate.

To get the most out of this Dum Audio product, follow these instructions carefully. If you have any questions, please contact Support or see the instructional videos and pages on our website:

www.dumaudio.com

FEATURES

- Solid MDF enclosure with real hardwood veneer
- Custom Dum Audio drivers: 7" aluminum cone woofer and 1" silk dome tweeter
- Power handling: 100 Watts RMS
- Nominal impedance: 4 ohms

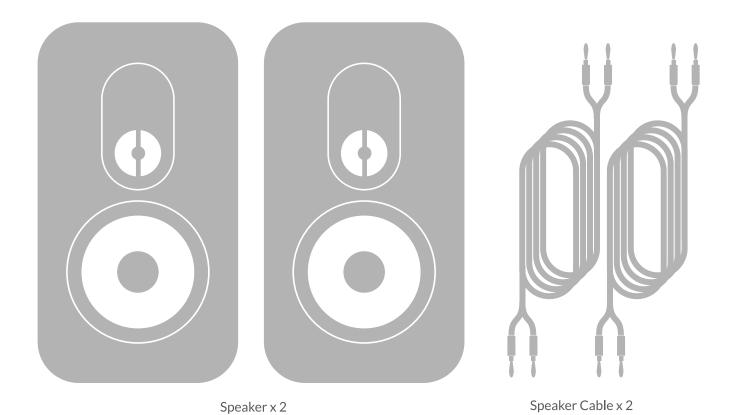

UNPAGKING

Carefully remove the contents from the packaging and verify that you have all the parts indicated below.

CONTENTS

- Speakers
- Speaker cables

Warning: This electronic equipment should never be exposed to excessive heat or any moisture. Place on a level surface with enough surrounding space to allow for sufficient ventilation during operation.

1	2" Port
2	1" Silk dome tweeter
3	7" Aluminum cone woofer
	D: 1:
4	Binding posts

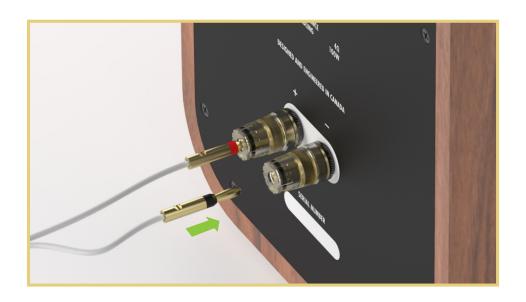

CONNECTING

Using supplied speaker cables, connect speakers to a compatible integrated amplifier as shown in the cabling diagram on the last page of this manual.

Note: Be sure to connect red/red and black/black.

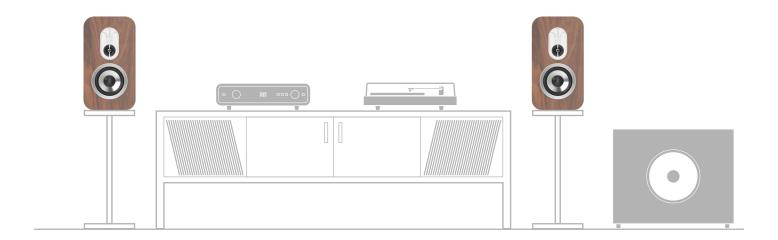

To connect the speaker wire to the speakers and amplifier, insert the banana plug directly into the front of the plastic terminal.

Note: Because the banana plugs are new, they will be stiff and therefore you will need to use some force to get them in the first time, but after that they will go in and out easily.

PLACEMENT

Do not place the speakers on the same surface as the turntable, otherwise the turntable will absorb the vibration from the speakers during playback. Ideally the speakers should be placed on separate stands with the tweeter at roughly ear level of your listening position.

ISSUE	SOLUTION
No Sound	Make sure the amplifier is plugged in and turned on.
	• Check that the input selector on your amplifier is set to the correct input.
	Make sure your input device is turned on, properly connected, and is operating properly.
	Check connections - re-seat cables or replace if necessary
Weak/thin/incomplete sound	Verify that all speaker cables are connected with the correct polarity. (pos to pos, neg to neg)
White noise/hissing/humming	If problem occurs while using a turntable, make sure it is grounded by connecting its grounding port to the grounding port on the amplifier with a proper ground wire.

Note: If the problem persists or you are experiencing an issue not addressed on this page, please contact support@dumaudio.com.

Dum Audio Inc. (the manufacturer) warrants this product to be free from defects in workmanship and materials, under normal use and conditions, for a period of one (1) year from the original invoice date. The manufacturer agrees at its option during the warranty period, to repair any defect in materials or workmanship, or to furnish a repaired or refurbished product of equal value, in exchange without charge (except for shipping handling, packing, return postage and insurance fees: which will be incurred by the customer). Such repair or replacement is subject to the verification of the defect or malfunction, and proof of purchase as confirmed by showing the model number on an original dated sales receipt. This warranty is only valid for the products purchased from a qualified distributor.

REPAIR AND MAINTENANGE

Important: This is not a User repairable product. Repairs should only be undertaken by the manufacturer or certified agents of the manufacturer. Failure to follow this restriction will violate the terms of the warranty and render it void.

REPAIRS

For all repairs contact Dum Audio.

MAINTENANCE

Wipe occasionally with a soft dry cloth.
