PRINTPLUSH LOGO MAT COLOUR GUIDE

SELECT CONTRASTING COLOURS

Some colours do not work well together. They may work on paper, but can be hard to distinguish when printed and absorbed into textured carpet.

Below are colour combinations that **we strongly advise against**, as there isn't enough contrast and will be difficult to differentiate when printed next to each other.

101	115	116	121	308	388	450	480
130	402	423	426			105	479
106	405	406	422			110	340
400	419	446	447			445	458
117	385	399				471	482
413	427	478				475	477
107	398	404				401	473
109	128	470				118	429
112	311	443				382	383
100	114	390					

- The best colour reference is the actual logo carpet swatches. **Always refer to the carpet swatches when finalising your colours.**
- Do not rely on the printout of the proof sketch. All printers are different and print in varying shades of colours.
- Please use screen colours as a **guide only** and refer to actual swatches before making final decisions. All computer screens vary in the shade of the colours they display.
