LISBOA Outdoor

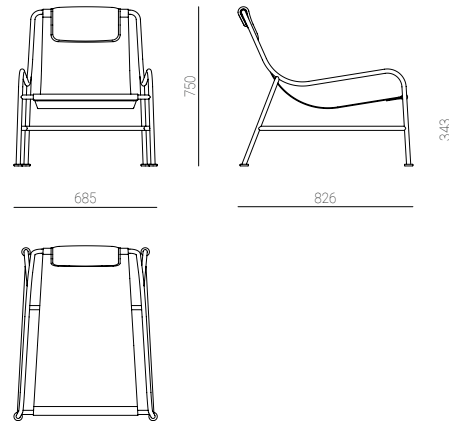

LISBOA Outdoor product sheet

Merging many observations from different cultures of how people use chairs and which role they play in their every-day life, Keiji Takeuchi designed the LISBOA outdoor lounge chair with a vision.

Embracing the purpose to take a break outside, the outdoor version of the LISBOA lounge chair invites you to just sit and relax under the sun, enjoying the long days or warm summer nights.

Designed to live outdoors, the chair is very light due to the open structure of stainless-steel tubes. The frame is beautifully wrapped in weather-resistant and environmentally conscious Sunbrella fabrics complemented with a set of zippers, allowing you to place or remove it in seconds. With 5 colours available, it can perfectly blend with any scenery and your own furniture. You can also combine the different colours to create a personalized mix & match set of chairs.
