ALLAY Lounge Chair

ALLAY Lounge Chair

ABOUT

Designed to have a calming and inviting presence, the ALLAY chair brings together craft and simplicity to create an honest, comfortable and timeless piece.

By engaging in the process of subtraction, details are reduced to create a pure and refined shape that is easy to connect with and will age gracefully. The form has been broken down to its essential components and balances aesthetics with practicality and durability.

CARE AND MAINTENANCE

The following care instructions are recommendations only.

MOR seals its veneers with a high-quality finish. For this reason, to clean solid wood and veneered surfaces, we recommend using a soft, slightly damp cloth, with a mild detergent in the case of stubborn dirt. We recommend that you always use environmentally friendly cleaning products and care for your furniture regularly and frequently. Before using any cleaning product, you should test it on an inconspicuous spot. Please follow the cleaning product manufacturer's instructions and contact a professional cleaning company in case of stubborn dirt or stains.

To avoid stains and other damage, liquids should be wiped away immediately. Wet surfaces should be dried immediately with a cloth. To extend the life of our products we apply a natural varnish to highlight and protect the properties of the natural wood. However, wood furniture reacts to environment. Exposure to light can alter its colour and also adapt its own moisture content levels to that of its environment. In the case of excessive fluctuations in temperature and humidity, however, it reacts by cracking and warping.

WARNING

Do not use neat, harsh, strong or abrasive cleaning fluids or furniture polish containing silicone or abrasives. They most commonly contain unsuitable solvents and/or colour additives, which ultimately leave a coating that is very difficult to remove and may affect the colour and finish of the veneer surface. If possible, avoid rubbing the surface while cleaning it, as this will make matte finishes shiny and charge the varnish with static electricity which will attract more dust.
