FURNA basket

FURNA basket

ABOUT

Inspired by the artisanal process of basketry from the island of São Miguel, in the Azores, and in collaboration with a local craftsman, three new and original shapes emerge for this object. The characteristics of this volcanic island originate a type of stone whose shape is used to give structure to the wicker. The irregular and organic lines of the FURNA basket result in a contemporary and versatile expression of an ancestral art. It can be used as storage or decorative element in all environments.

CARE AND MAINTENANCE

The following care instructions are recommendations only.

Wicker

MOR uses raw wicker, so for this reason, to clean the baskets we recommend using a dry soft cloth or slightly damp cloth. We recommend that you always use environmentally friendly cleaning products and care for your objects regularly and frequently. To avoid stains and other damage, liquids should be wiped away immediately. Wet surfaces should be dried immediately with a cloth. Wicker is a material that reacts to environment, so keep away from direct sunlight and protect it from humidity.

WARNING

Do not use neat, harsh, strong or abrasive cleaning fluids. Do not use bleach.
