ALFAMA

ALFAMA product sheet

A key element for modern living is an efficient use of space. The less area we use for storage, the more room will be available to other things that makes you enjoy living. ALFAMA is, in its own unique way, Siza's proposition to meet these requirements – the ideal cabinet that fits both small and larger apartments and bedrooms.

Due to a simple system based on a metal piece placed crosswise, clothes are not hanged next to each other, but behind each other. That creates a little cabinet depth of 51 cm and prevents it from taking much space in the room. Also, its taller than usual look lies in the fact that Siza wanted to have a dimension that could easily keep a classic long trench coat without the need to fold it.

The open top and back of the wardrobe creates constant air ventilation, which allows freshness and, in the author's own words, "prevents it from the sensation that it has been closed for a long time". On the bottom of the wardrobe there are two shelves, great for shoes, hand bags, boxes or any other small items that need to be kept.

MATERIALS

Structure in veneered plywood and solid wood - available in Ash, Oak and Walnut.

Coat hanger in stainless steel.

FINISHINGS

Surface protected with matte lacquer.

Ash

Oak

Walnut
