MIGO

MIGO product sheet

MIGO table interprets simplicity in its purest form. Minimal in its components, MIGO is a table consisting of two parts: a table top and a conical shaped base whose top ends with a strap.

The soft and friendly in-between shape of round and square makes the table suitable for different situations and supports the versatility and practicality it aims to contain. MIGO can be spontaneously carried around depending on the needs to be fulfilled, whether at home or in a modern office space. That may be the bedside table for a book, space for cups and small plates for an afternoon with friends, space for a coffee and a cake, or for a child using the living room as playground. A table that is easy to ship, quick to put together and intuitive to move around.
