

RGB Tree Logistics

There are a few things our team needs to know to prepare for your RGB Tree installation. Please review these questions to help us make your planning and installation as smooth as possible.

Location

- What size tree or product are you looking for?
- Does your desired product suit the area in which it will be displayed?
- Does your space need additional elements?
- Where will the installation be?

Delivery

- When do you need your product/s installed?
- Who will be doing the installation?
- How will you store your product/s after the season?

Installation

- What are the power requirements?
- Is a ballast required for our outdoor product?
- If necessary, do you have the proper engineering and permitting requirements?
- How do you plan to maintain your tree and/or products throughout the season?
