30' MOSAIC TREE: INSTALLATION

COMPONENTS:

Tree: Metal Frame with Acrylic Panels
 (5) Extra Acrylic Panels
 (1) Snowflake Topper
 (8) Wall Washers
 (7) Cable Extenders
 (5) Electrical Extension Cords
 (8) Adjustable Bands
 (100) 6" Clear Cable Ties
 (15) 18" Clear Cable Ties
 (15) 36" Clear Cable Ties

The Mosaic Tree is shipped with the acrylic panels attached and 5 extra panels are sent.

STEP 1: BOTTOM TWO LEVELS (1&2)

Level 1 is cut in half and the two half circles need to be bolted together in order to make the complete circle for Level 1. Do the same for Level 2 and then bolt Level 2 on top of Level 1.

STEP 2: TOP TWO LEVELS (3&4)

Place Level 3 on top of Level 2 that is connected to Level 1 and bolt into place. Add the final Level 4 to the top of Level 3 and bolt into place.

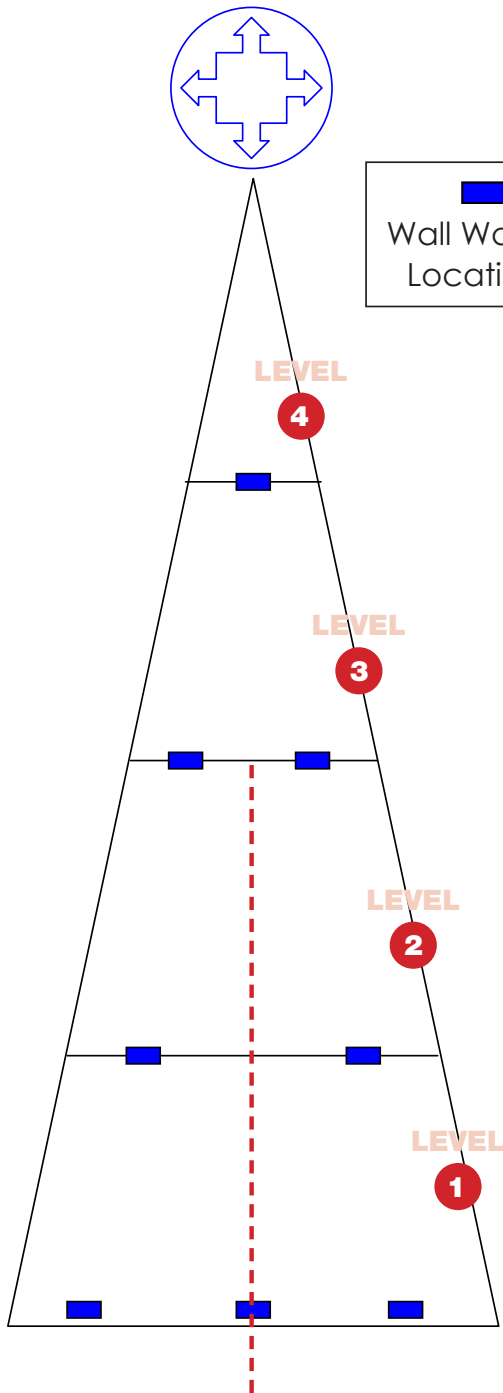

STEP 3: ADDING THE WALL WASHERS

The tree is lit by 8 wall washers attached on the inside. Please refer to the diagram to determine the location of each wall washer. Each wall washer unit will point upward and needs to be attached with an adjustable band. The units can be zip tied in place while you work to secure them with the adjustable banding. Refer to the Wall Washer Instructions included for programming. All of the 8 units in the tree should be set to pure white.

Each unit placed will run down to the power source via an extension cord. The units will be connected to one another with cable extenders that allows them to talk to one another. You can remove panels off the tree as needed to reach all cabling.

STEP 4: THE SNOWFLAKE TOPPER

Slide in the Snowflake Topper pole in to the receiving end of the top of the tree. Run an extension cord down to the power location and attach to the frame with cable ties.

LEVELS 1 & 2 SHIP IN TWO SEPARATE PIECES AND NEED TO BE ATTACHED IN STEP 1

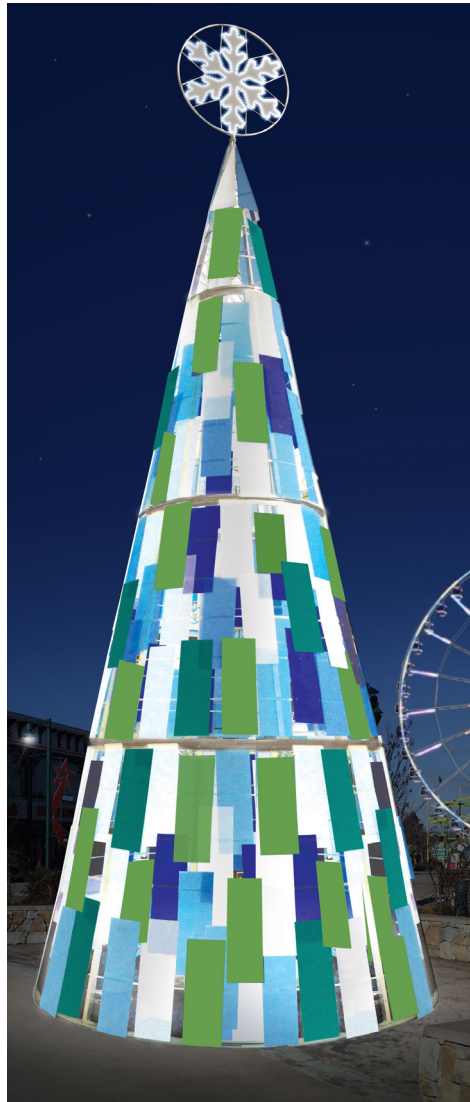

30' MOSAIC TREE COLOR PALETTE

WINTER

Teal, Light Blue, Dark Blue, White

COASTAL
