watt 200w, lumin 17,000lm

93.7″

48″

8ft LED light

LED panel width 2.75″, height 2.4″

watt 180w, lumin 15,500lm

82.7″

43.3″

7ft LED light

LED panel width 2.75″, height 2.4″

watt 160w, lumin 13,800lm

Parts

A B C D E F M N

G H I J K L

Step 1

K → H

Step 2

G   From step 1

Don't fully screw, leave a small gap

## Step 3

I

Adjust length by pushing this small button
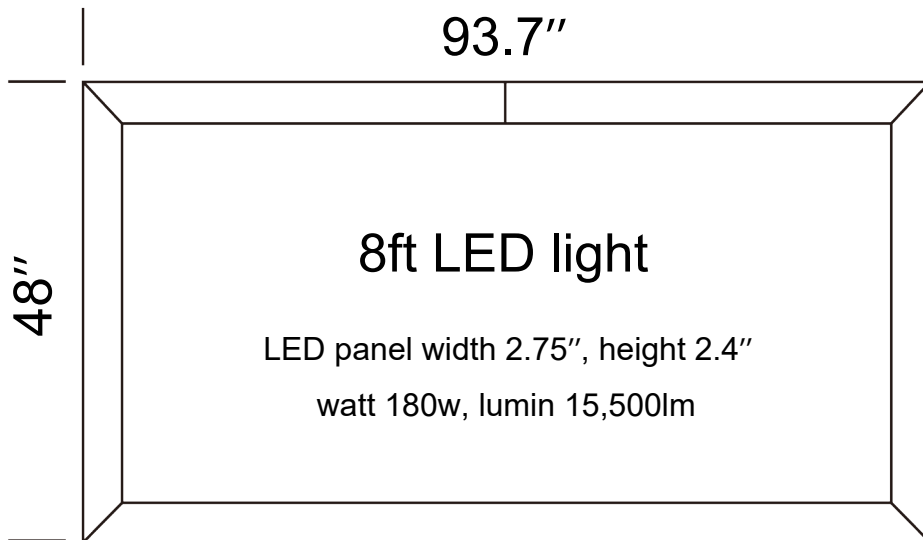

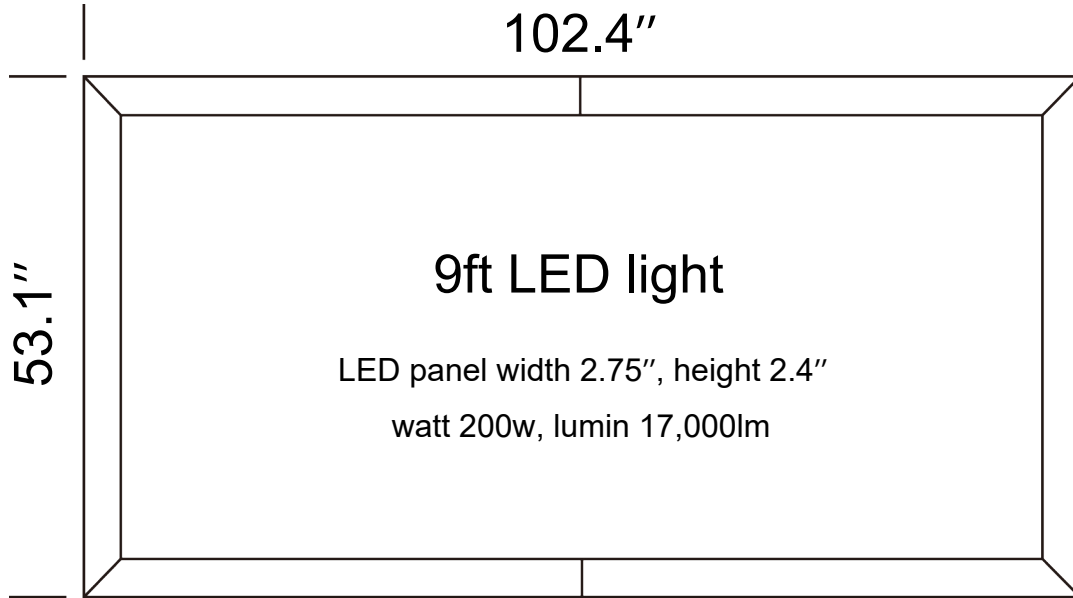

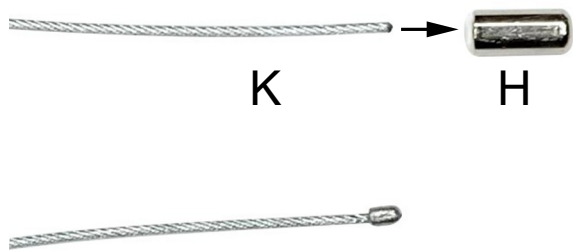

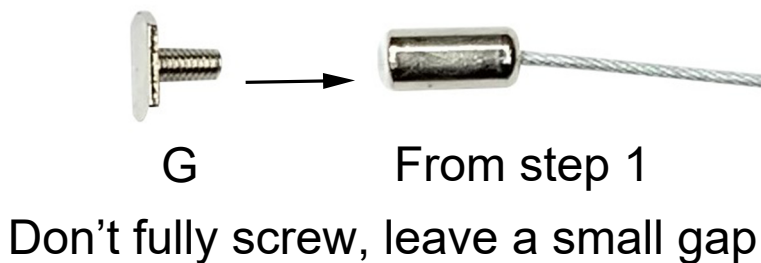

*Suggest light height: 75-90 inches from the floor.

Step 4

E   J →

Locate (4) sturdy ceiling joists over each LONG side, right above table rails, then use screw E attach Part J to the ceiling.
*Use part F as drywall anchor if there is no available sturdy joist.

Step 5

Connect suspension cable from step 3 to the ceiling.

Step 6

Repeat step 1 to step 5 up to 8 suspension cables.

Final result should look like below.

Step 7

Total 8 suspension cables, 4 on each long side
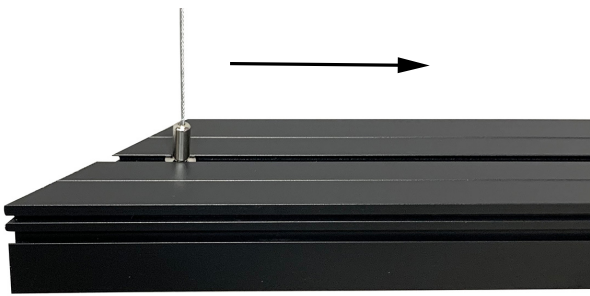

Step 8
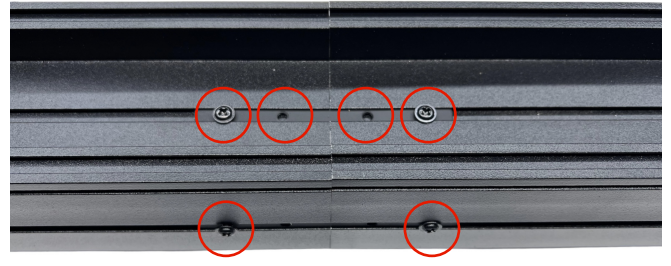

(1)　　**(6)**

(2) Prepare to attach 6 sections LED light to suspension cables. Place number 1 and 6 on the same side, 3 and 4 on the other side. Place number 2 & 5 as shown in the pic.

(5)

(3)　　**(4)**
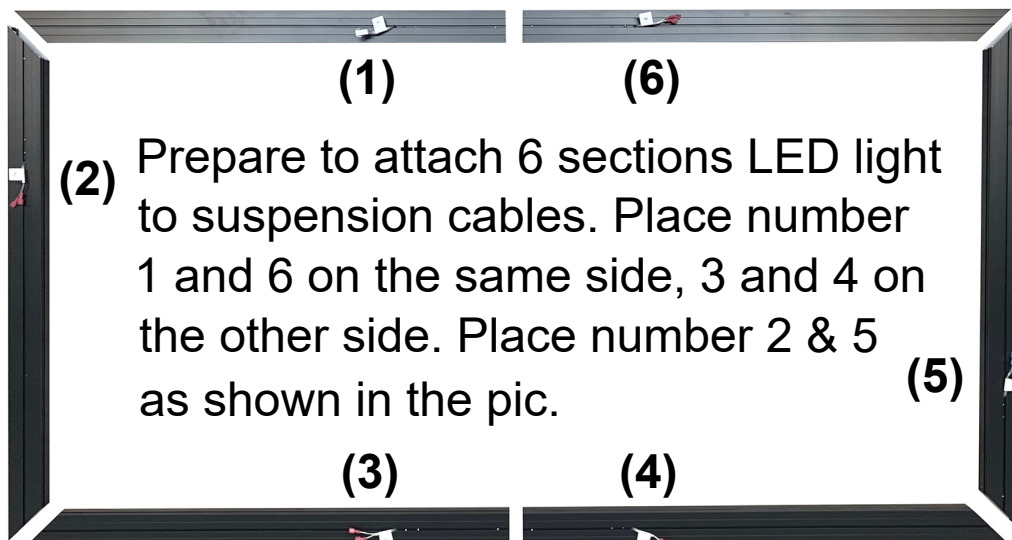

Step 9

Slide the end of suspension cables into the top of light.
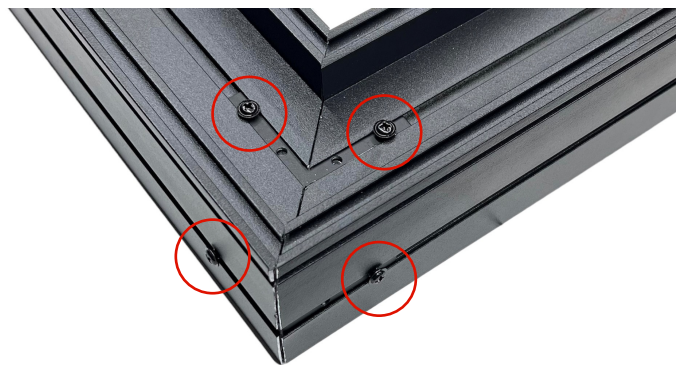

*Install two long sides first.

Step 10

Use part Ax3 and part Dx8 to cennect section 1&6.

Step 11

Use part Mx2 and part Dx4 to cover the joint on both sides.

Repeat step 10 and 11 to connect section 3&4.

Step 12

Once finished two Long sides, connect two short sides to the long side.

Use part Bx2, Cx1, and Dx6 to connect each joint on the corner.

Step 13

Use part Nx2 and part Dx4 to cover both inside corner and outside corner.

Step 14

Use the electrical cable (part L) to wire each LED light, in the order of number 1 to 6 with **ANTI-CLOCK** direction. (make sure align connector)

Step 15

Once all 6 sections are connected, place the electrical cable nicely inside the frame to make sure it is not visible from the side.
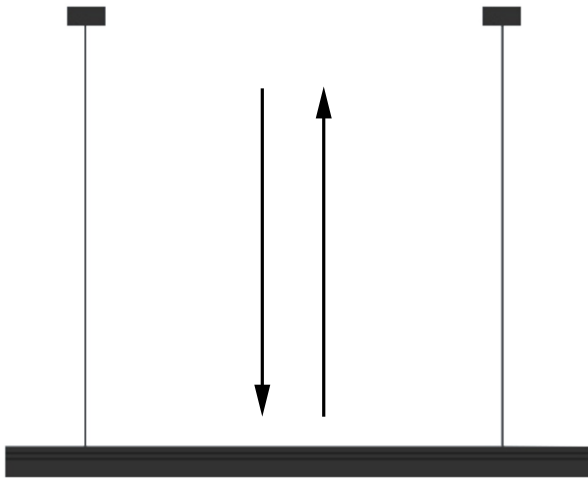

(top view)

(side view)

Step 16

Adjust final height by using level tool.

Recommend light height is 75-90 inchs from floor, or 45-60 inches from the table cloth.

Step 17

For non-dimmable model:

You can either plug the light into an outlet, or remove the 2-pin plug to hardwire it with a wall switch.

If you are going to use the plug, and don't have a switch for the outlet, we highly recommend to get a remote outlet to turn on/off the light.

*The light can NOT be compatible with a dimmer switch.
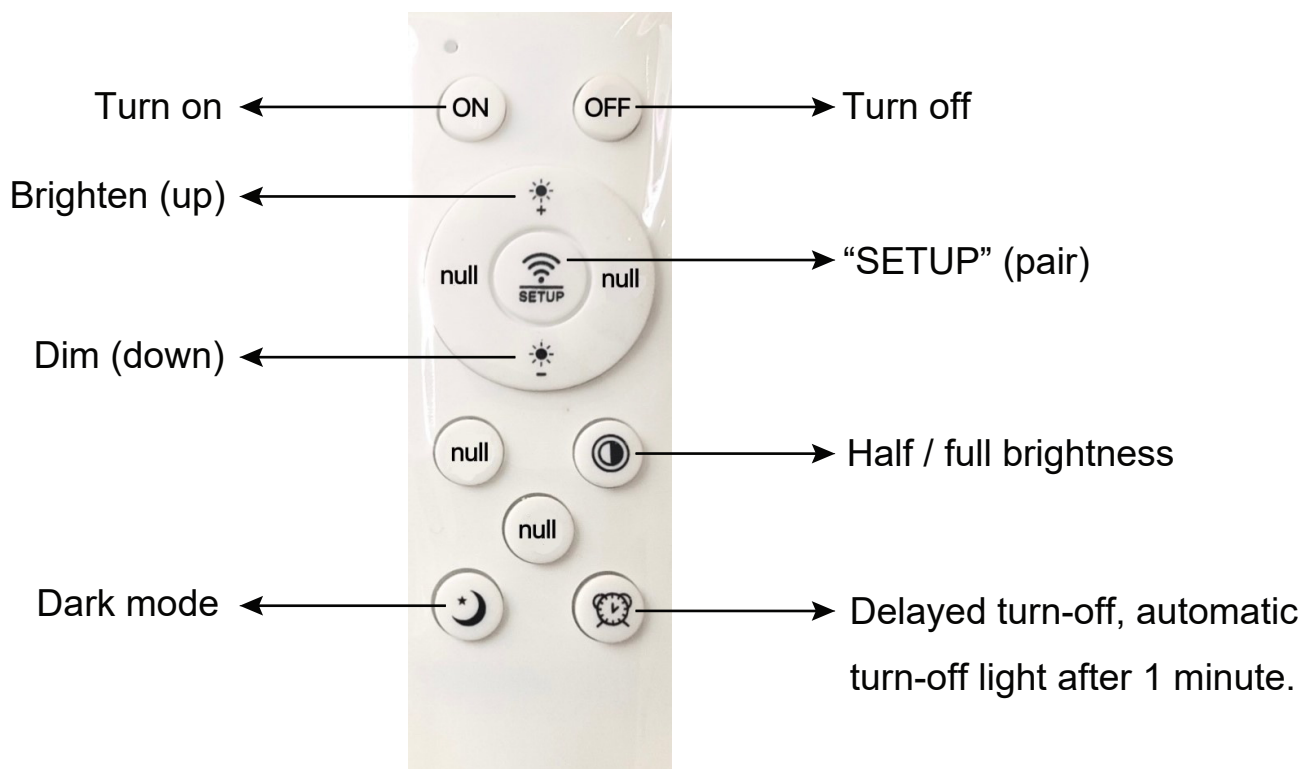

For dimmable light, please check Step 18.

Step 18

For dimmable model:

You can either plug the light into an outlet or hardwire it.

*The light can NOT be compatible with a dimmer switch. It can only be dimmed with the remote.

Pair the remote with light:

After powering on, you have 5 seconds to pair the remote. Quickly press "SETUP" button 3 times within 5 seconds, then the light will flash twice, which means paired successfully.

Turn on ← ON

OFF → Turn off

Brighten (up) ←

null SETUP null → "SETUP" (pair)

Dim (down) ←

null

Half / full brightness

null

Dark mode ← Delayed turn-off, automatic turn-off light after 1 minute.

*(4) "NULL" buttons are not functional.
