Boldenone Undecylenate is a synthetic anabolic androgenic steroid. It has become popular among athletes and bodybuilders for its light side effects. Also, EQ 300mg has anabolic properties for regular muscle growth during the cycle. The steroid has named "Equipose" because of its use in the home (equine). EQ 300 is an injectable product that is often used by bodybuilders in a steroid cycle. The active substance of this medication is Boldenone Undecylenate. Original EQ 300 is produced by the world famous brand Dragon Pharma. Packing of this product includes 10 ampoules (300 mg/ml).

EQ 300, or boldenone undecylenate, is a favorite veterinary steroid of many athletes made by Maha Pharma. Its effects are strongly anabolic, and only moderately androgenic. By itself, it will provide a steady and consistent gain in mass and strength. However, best results are achieved when it is used in conjunction with other steroids. Equipoise (EQ) is the trade name of the anabolic-androgenic steroid Boldenone Undecylenate. This drug firstly was classified as a veterinarianian anabolic steroid to help animals like horses to gain weight and enhance their performance.
