⚡REFUEL CHARGER USER GUIDE

Base LED Indicator

- **Power Connection:** When connected to a power source, the base LED will briefly illuminate green, indicating power is successfully connected (no battery packs should be on the dock at this stage).

- **Battery Status Indicator:** Upon placing a battery pack in either of the two slots, the base LED will turn red to signify charging and green when fully charged.

- **Independent Side Indicators:** The right and left sides of the LED indicator operate independently, displaying the charging status of each respective battery.

Basic Usage Instruction

- **Charging Capacity:** The dock charger is designed to simultaneously charge two battery packs.

- **Battery Placement:** Make sure to align the female USB-C ports in your battery pack with matching male USB-C ports in Refuel charging Dock

- **Safe Removal:** To remove the battery pack, lift it upwards from the dock charger. Avoid side-to-side shaking to prevent damage to the connector.

Optimal Performance

For best performance, exclusively use the provided charging accessories, including the Darklab wall adapter and the USB-C cable.
