### Login method

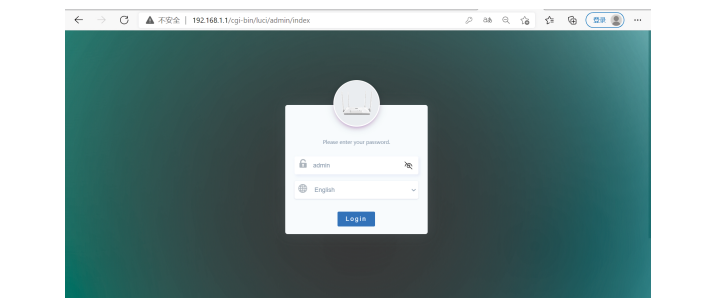

Please connect devices according to the above topology.

Follow the steps for quick Router configuration, using initial setup wizard:

Step 1 Connect your PC to device via Ethernet cable or Wireless.

Note:  
● Default WiFi name:WI-TEK\_XXXX, Password:88888888

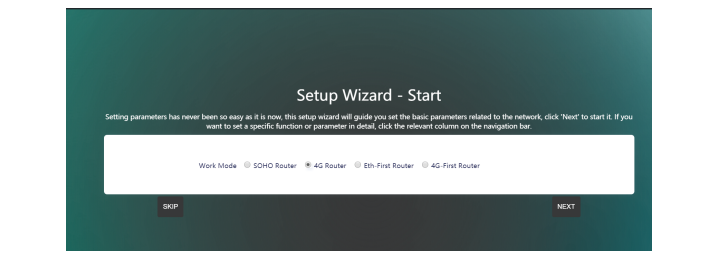

Step 2 Launch your web browser then enter <http://192.168.1.1> in the address bar and specify the default login key:admin.

### Configuration steps

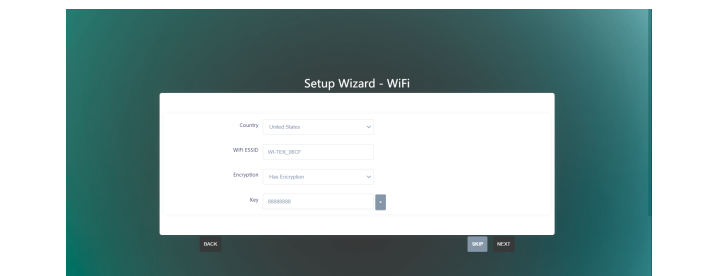

There are four working modes: SOHO Router, 4G Router, Eth-First Router, 4G-First Router

1) The default mode is 4G Router, click Next to enter.

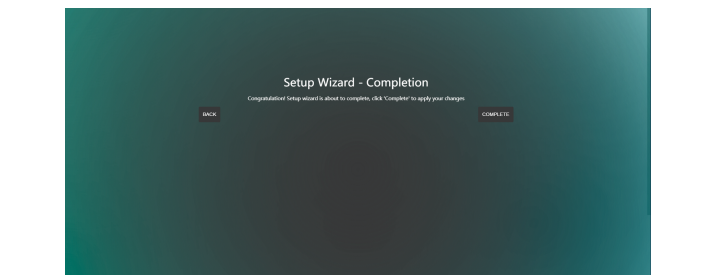

Note:  
● Eth-First Router : If the internet service becomes unavailable via the Eth connection, the router automatically switches to the LTE network.  
● 4G-First Router: If the LTE network service cannot be connected, the router will automatically switch to the Eth network.

2) Select the country, fill in the wireless SSID, encryption method, and key information, and click Next to enter.

### Configuration steps

3) Click the complete button to complete the setting.

4) Configuration complete.

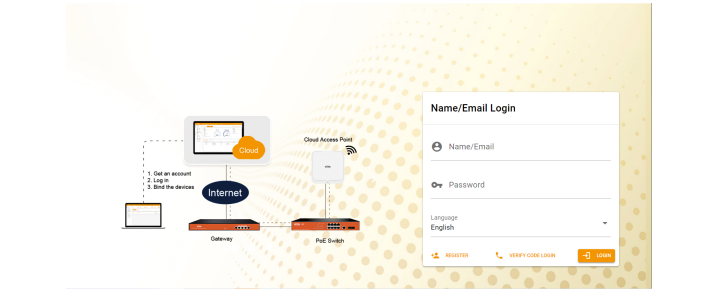

### Cloud management settings

Step 1 Launch your web browser then enter <http://cloud2.wireless-tek.com> in the address bar.

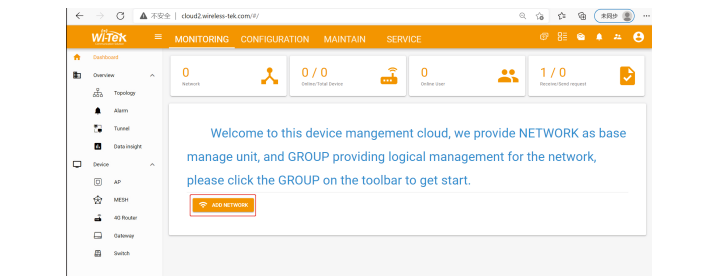

Step 2 Register an account password by user name or email.

Step 3 Log in to the cloud account with the account password after registration.

After the login is successful, the steps to bind the device on the cloud account are as follows:

1) Click ADD NETWORK

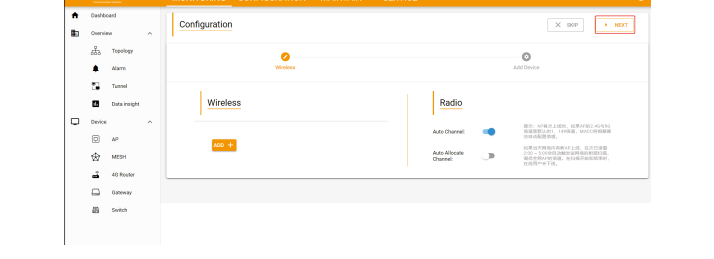

### Configuration steps

2) Fill in the group name and location, click save.

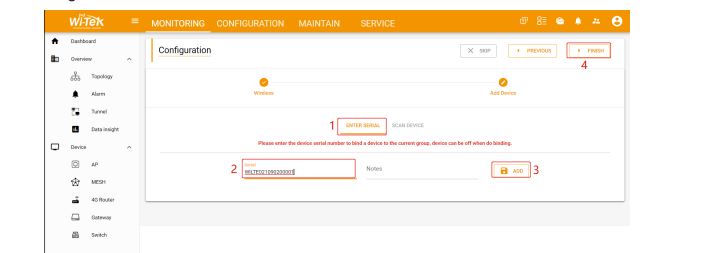

3) And click next.

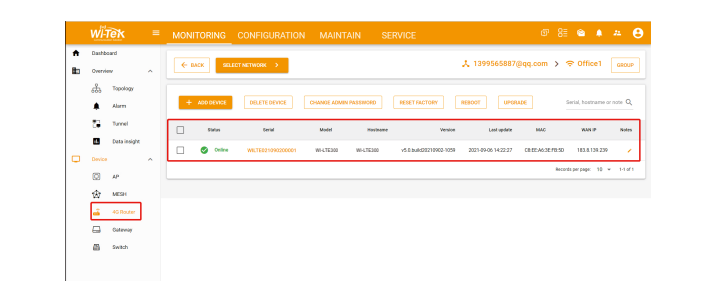

4) Enter serial number, click ADD to create and click FINISH, the configuration is complete.

Note:  
The 17-digit SN code of the 4G Router is shown on the sticker on the back of the device.

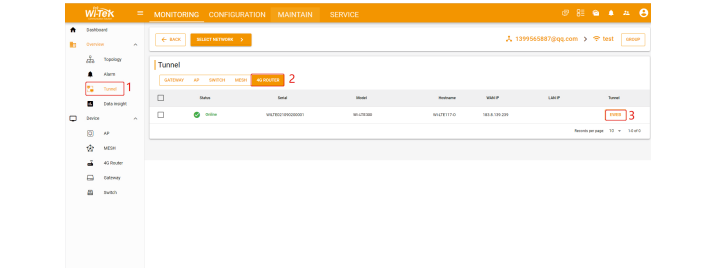

### Configuration steps

5) In the relevant device options, you can see the bound device information.

6) Click Tunnel, select 4G Router, click EWEB to log in to the device.
