

“VITECH PAPER TRIMMING KNIFE”

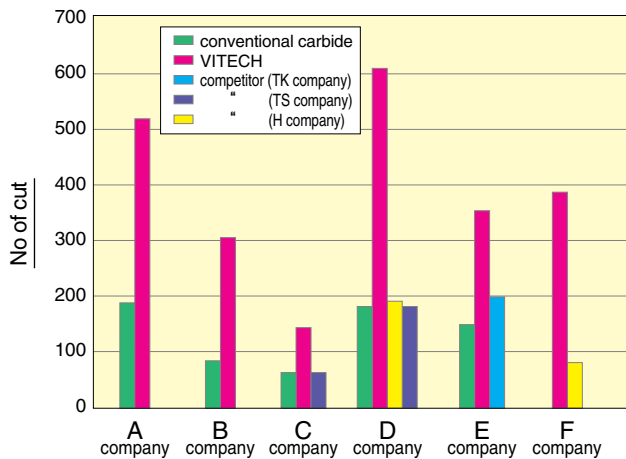

Patent Pending

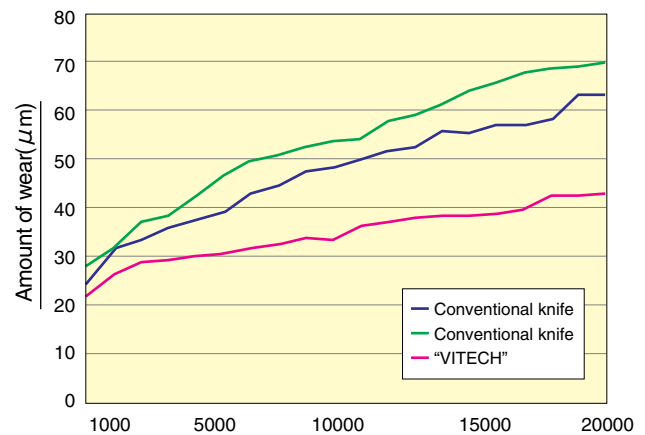

Features

- 1) Resists chipping and nicking more than regular carbide producing smoother books.
- 2) Very cost-effective due to twice the life of regular carbide.
- 3) Due to the new manufacturing process. “Vitech” knives are very stable, straight and the cutting edge is without stress. This produces longer lasting life between regrinds and higher precision cutting without time consuming adjustments.
