INSTRUCTIONS:

Dilute accordingly and spray, brush or soak. Allow to dwell for 1-2 minutes then rinse or wipe off. For food surfaces, rinse thoroughly with potable water.

Test fabrics and carpets for colour fastness. When using strong concentrations on old paint, test effect on paintwork.

THODE ENVIRO CLEANER, by way of its cationic ingredient, will disinfect effectively at dilutions of up to 1:30 parts water. Due to the lower molecular weight for disinfecting ingredients with other THODE disinfectants, these may offer higher disinfecting properties and/or increased dilution levels. The cleaning operation, however, may not be as effective.
