

## Turtlebrace Infant, Pediatric, and Adult Ankle Brace (AB) Sizing Chart

The following measurements are the physical dimensions *before warming*.

- When the brace is warmed and soft, it can be stretched – more notably in circumference than length. See estimates of stretched measurements.
- The potential for stretch is proportional to the size of the brace. Larger sizes stretch further than smaller sizes
- Stretch in shaft and foot length is limited by the nonelastic zipper.
- You can expect some slight shrinkage (up to 2%) after the fitted brace cools, with less shrinking if you wait until the brace is fully hardened before removal.

INFANT	Models	Ankle Circumference		Foot Length		Shaft Height		Mid-Calf Circumference	
		Minimum + ~10 stretched		Minimum + ~3 stretched		Minimum + ~3 stretched		Minimum + ~10 stretched	
	TBBC-01 Small - 1M		10.8 cm		6.5 cm		11 cm		12.6 cm
TBBC -02 Medium - 6M	12.6 cm		8 cm		15 cm		16.2cm		
TBBC-03 Large - 18M	14.4 cm		9 cm		19 cm		19.8 cm		

PEDIATRIC	Models	Ankle Circumference		Foot Length		Shaft Height	
		Minimum + ~10 stretched		Minimum + ~3 stretched		Minimum + ~3 stretched	
	TBCP-01 Small - 5Y		16.5 cm		9 cm		22 cm
TBCP-02 Medium - 7Y	17.8 cm		13 cm		28 cm		
TBCP-03 Large - 8Y	19 cm		13.5 cm		29 cm		

ADULT	Models	Ankle Circumference		Foot Length		Shaft Height	
		Minimum + ~10 stretched		Minimum + ~3 stretched		Minimum + ~3 stretched	
	TBCA-01 Small		20.3cm		18 cm		32 cm
TBCA-02 Medium	21.6cm		19 cm		36 cm		
TBCA-03 Large	22.9cm		21.5 cm		39 cm
