The Skinpharma Cosmeceuticals skincare range has been specifically developed to maintain good skin health for you on a daily basis. Skinpharma skincare fights the first signs of ageing by targeting each layer of the skin to thoroughly hydrate and repair. The range introduces an affordable & clinically proven integrated mix of products that work to achieve brighter and healthier skin.

As we age we lose moisture and elasticity in our skin which causes wrinkles and other signs of ageing to appear. Our range rehydrates skin with a series of clinically proven ingredients. It includes lightweight non-oily hydrators and skin revitalising serums to stimulate collagen and elastin, whilst helping skin to repair and renew more rapidly.

The range has been developed with your daily skin health needs in mind and will help refine pores and minimise fine lines and wrinkles as well as address any pigmentation issues.

Contains the natural clinically proven AHAs, glycolic and citric acid to gently remove the build-up of dead skin cells together with salicylic acid to remove impurities and excess oil. This combination will cleanse your skin and increase cell turnover revealing new, younger looking skin while preparing your skin for your daily skincare regime.

Massage onto your dry skin. Leave on the skin for a few minutes to get to work before rinsing with warm water and patting dry. Do not use as an eye makeup remover. Frequency of use should be as directed by your skincare specialist. For external use only.

R +

A powerful and highly effective serum containing one per cent liposomal retinol, a stabilised vitamin A derivative which has been clinically proven to increase cell turnover. R+ will reduce pore size, resulting in firmer younger looking skin as well as reduce visible signs of ageing including pigmentation and uneven skin tone.

Apply to your clean skin at night. Use as directed.

**It is also important to use SPF 50 sunscreen, as retinol increases the skin's sensitivity to sun exposure.**

For external use only.
