

Cold Painted

Color is applied to Campania's cold painted planters after they are fired. As such, the color is not integral to the piece as in a fully glazed planter. To maintain the integrity of the planter and prevent peeling/fading of the surface color, we recommend that cold painted planters be used indoors only.

Care & Maintenance

Cold painted planters are recommended for indoor use only. If your planter is supplied with a saucer and drain hole, it is important that the drain holes remain unobstructed to ensure proper drainage.

Cleaning Instructions

It is recommended that cold painted planters can be cleaned with mild soapy water. Do not use alcohol based or corrosive cleaners or clean with anything abrasive.
