

## **EFFLORESCENCE CLEANER**

**Safety glasses, gloves, and mask are needed.**

**The cleaner is acidic.**

- 1. Apply the cleaner with a spray bottle. Allow 3-5 minutes for the cleaner to stop foaming.**
- 2. Using a brush, clean the surface to remove buildup. If efflorescence is heavy, a second treatment may be necessary.**
- 3. Rinse with water.**
- 4. Apply a light coat of color if necessary.**
- 5. Apply a coat of sealer if necessary for that particular color.**
