SECTION 4 – FIRST AID MEASURES					
General	: Call a Poison Center or doctor if you feel unwell.				
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If experiencing respiratory symptoms: call a doctor/physician.				
Skin contact	<ul> <li>Remove/Take off immediately all contaminated clothing. Flush affected skin with gently flowing lukewarm water for at least 20 minutes. Seek immediate medical attention/advice.</li> </ul>				
Eye contact	: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical advice/attention.				
Ingestion	<ul> <li>Rinse mouth. Do NOT induce vomiting. Call a POISON CENTER or doctor/physician if you feel unwell.</li> </ul>				
Notes for Physician	: Treat symptomatically.				
Signs and symptoms of s	hort-term (acute) exposure				
Inhalation	: Symptoms may include coughing and shortness of breath.				
Skin	: Symptoms may include redness and itching. Contact with wet material, or moist areas of skin, causes skin burns. Skin thickening, cracking, or fissuring may occur.				
Eyes	: Direct contact may strongly irritate or burn the eyes. Could cause blindness.				
Ingestion	: Symptoms such as gastric pain, nausea, vomiting, and diarrhea may occur.				
Effects of long-term (chro	nic) exposure				
	: Prolonged inhalation may cause adverse lung effects with symptoms including coughing and shortness of breath. Repeated or prolonged inhalation of fine dusts may cause severe scarring of the lungs, a disease called silicosis, and alveolar proteinosis (lower lung disease).				
Indication of need for imme	diate medical attention or special treatment				
	: Difficulty breathing persists after removing the person to fresh air.				
	Any burn to the skin.				
	Any exposure to the eye which causes irritation.				
	Ingestion.				
	SECTION 5 – FIRE FIGHTING MEASURES				

Suitable extinguishing media Unsuitable extinguishing media		Carbon dioxide, dry chemical powder, foam. Water. Contact with water may cause hydration and formation of caustic alkaline material.
Hazardous combustion products	:	Calcium oxide, calcium oxalate, vinyl acetate, acetic acid, formic acid, formaldehydes, carbon monoxide, and carbon dioxide.

Special fire-fighting procedures/equipment

: Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame. After fires have been extinguished, carefully clean all equipment and surfaces exposed to fumes.

: Do not allow material to enter drains or contaminate ground water system.

Environmental precautions

Fire hazards/conditions of flammability

: Not flammable under normal conditions of use.

Flammability classification (OSHA 29 CFR 1910.1200, WHMIS 2015)

: Not flammable

## SECTION 6 – ACCIDENTAL RELEASE MEASURES

Personal precautions :	Restrict access to area until completion of clean-up. All persons dealing with clean-up should wear the appropriate chemically protective equipment.					
Protective equipment :	Refer to Section 8 on this Safety Data Sheet, EXPOSURE CONTROLS / PERSONAL PROTECTION, for additional information on acceptable personal protective equipment.					
Emergency Procedures :	If a spill/release in excess of the EPA reportable quantity is made into the environment, immediately notify the national response center in the United States (phone: 1-800-424-8002). Outside of the U.S. call the emergency number listed in Section 1.					
	US CERCLA Reportable quantity (RQ): None reported.					
Methods and materials for containment and cleaning up						
:	: Ventilate area of release. Eliminate all ignition sources. Stop spill or leak at source if safely possible. Contain material, preventing it from entering sewer lines or waterways. Using HEPA vacuum, or other dustless methods, gather up spilled material and place in suitable container for later disposal (see Section 13). Avoid adding water, material becomes alkaline when wet. Notify the appropriate authorities as required.					
Prohibited materials :	Avoid adding water, material becomes alkaline when wet.
