

HOW TO CREATE A TABLETOP FOUNTAIN

ITEMS YOU WILL NEED:

- TotalPond® 80 GPH Fountain Pump
- Tabletop Fountain of your choosing
- Black Polished Pacific Pebble
- 1-1/4 in. x 6 in. Drill Bit
- Plants & Potting Soil
- Safety Eyewear

Step 1: Using the 1- in Drill Bit, drill a hole in the section of the planter you wish to be the water reservoir.

TIP! Wear safety glasses when operating an electric tool.

Step 2: Run the cord for the fountain pump through the newly drilled hole in the reservoir.

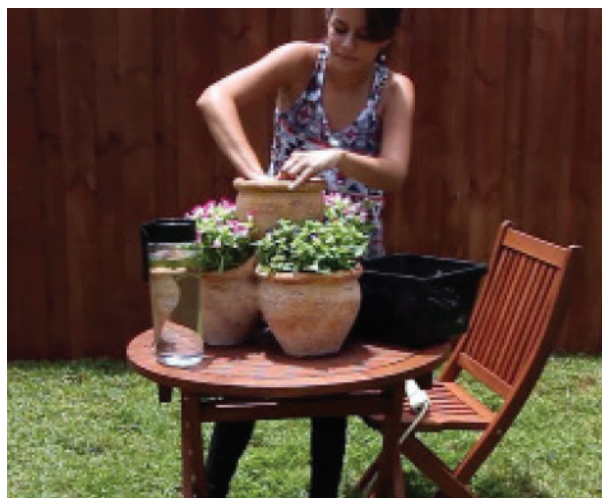

Step 3: Use plumber putty to secure the pump and seal the hole.

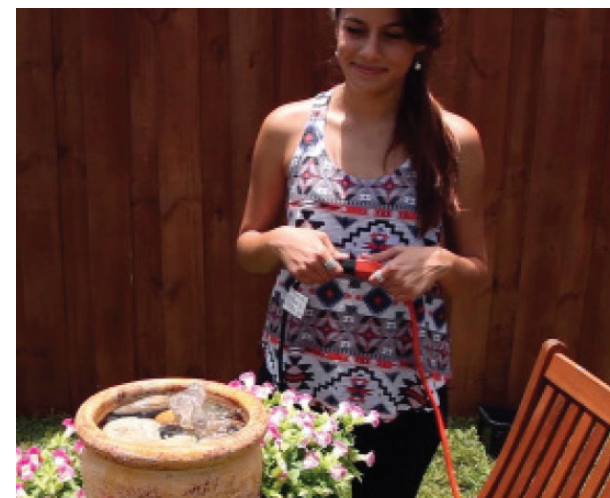

TIP! Do not move the cord while the putty is setting.

Step 4: Begin to plant.

Step 5: Place the black polished pebbles around the pump in the reservoir.

Step 6: Submerge the pump in water. Also, take this time to give your plants a drink. Plug it in and enjoy!
