ECO MODE

## ILLUMINATED KEYBOARD AND DISPLAY

When at rest, KAIRO is an elegant and discreet telephone that does not emit light, but with one key press, the keys and the screen light up so that calling is very easy even at night.

## ECO MODE: LESS RADIATION

The telephone does not emit any radiation when it is in standby mode. And during a call, its environmentally friendly technology adjusts power transmission to the distance between the base station and the handset.
