RECYCLED D30® MATERIAL

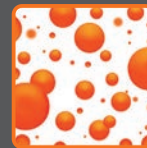

LOW PROFILE AND FLEXIBLE

## WHAT IS D30®

D30® uses a combination of patented, patent-pending and proprietary technologies to make rate sensitive, soft, flexible materials with high shock absorbing properties. It offers the thinnest and most advanced protection against impact. D30® materials are made using a combination of advanced polymer chemistry and cutting-edge design. The materials are soft and flexible, with no compromise on comfort, but react differently when force is applied. D30® absorbs and dissipates energy during an impact, reducing the amount of force transmitted to your body compared to standard foams.

## HOW D30® TECHNOLOGIES WORK

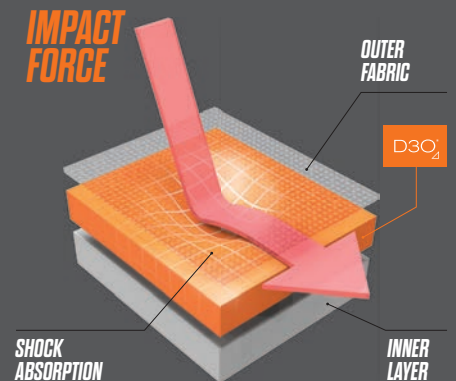

SOFT AND FLEXIBLE MATERIAL

ABSORBS AND DISSIPATES IMPACT ENERGY

RETURNS TO FLEXIBLE STATE

## HOW D30® MATERIALS WORK

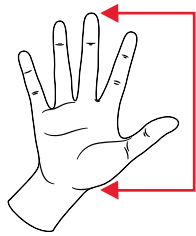

D30® has a unique molecular structure; in standard conditions, the molecules flow freely allowing the material to remain soft and flexible, but on impact, they lock together to absorb and dissipate the impact energy and reduce the transmitted force. The molecules instantly return to their flexible state. D30® is strain-rate sensitive, which means the stronger the impact, the more the molecules react, providing great protection.

CCM uses D30® Smart Material in key areas that require the highest degree of protection and comfort due to its many excellent properties. D30® materials allow CCM products to remain lightweight and manage various types of impacts often experienced in hockey.

THE ABSORPTION, EVAPORATION AND VENTILATION OF THE GEAR ALLOWS THE BODY'S CORE TEMPERATURE TO COOL QUICKER, HELPING YOU MAKE FASTER, BETTER DECISIONS WHEN IT COUNTS.

YOU'LL NOTICE THE DIFFERENCE ONCE YOU'RE REALLY GOING ALL OUT ON THE ICE. AER-TEC KEEPS YOUR BODY TEMPERATURE REGULATED AND COOL, WHICH HELPS KEEP YOUR PERFORMANCE FROM DECLINING AND ALLOWS YOU TO STAY AT THE TOP OF YOUR GAME. SAY GOODBYE TO WET GEAR AND OVERHEATING. SAY HELLO TO THE NEWEST TECHNOLOGY IN PERFORMANCE.
