SANIFOG-SF500ES ELECTROSTATIC BACKPACK SPRAYER

Our ElectroStatic Service or Product offers full room electrostatic spray cleaning by electrically charging the chemical solution so that when released the solution quickly bonds to surfaces instead of falling straight to the floor. This technology, typically used to sterilize offices, restaurants, universities and public transportation, is now available commercially for faster sanitizing times thanks to ElectroStatic.

WHERE CAN SANIFOG-SF500ES BE USED?

Hospitals

Venues

Supermarkets

Offices

Transportation

Daycares

Theatres

Events

Restaurants

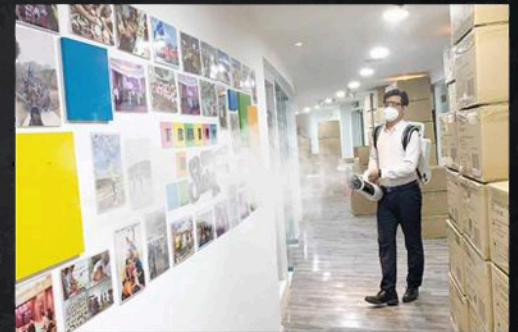

Schools

Gyms
