SPEC SHEET

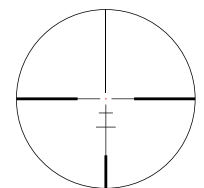

The new CORE 2.0 HX Series of riflescopes from Sightmark is an improvement on the previous Core, offering upgraded glass, finer click adjustments, and improved low light performance. Its finely etched reticles and exact adjustments make taking shots simple and easy.

With its solidly built housing made of aircraft grade aluminum, the CORE 2.0 HX promises to be a dependable tool in any hunting environment.

Shooters of all skill levels will appreciate the CORE 2.0's clarity and precision.
