Waterproof Rating	IPX7 Water & Dustproof	IPX7 Water & Dustproof
Weight (oz)	18.8	24.8
Lens Covers Included	Yes	Yes
Scope Rings Included	Yes	Yes

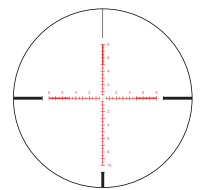

SPECIFICATION SHEET

Designed for practical shooting in tactical environments, the Sightmark Core 2.0 TX Riflescope Series has received a modern design to improve on the already impressive Core Series. The Core 2.0 TX now has clearer glass and better low light performance than its predecessor as well as finer click adjustments on its scope turrets.

The Core 2.0 TX is waterproof, dustproof, and shockproof, capable of withstanding anything from blinding winds to gritty sand. Its high MOA adjustments and locking turrets also make it a great for 3-gun competitions or plinking on the range, while its Bullet Drop Reticle, designed specifically for 55gr 5.56x45mm ammo, makes it a perfect mount for your AR platform.
