

FEATURES

- Low-power consumption with 12-hour auto shut off
- Quick and easy windage and elevation adjustments with any flat head tool
- 3 MOA red dot reticle with 10 brightness levels
- User friendly ambidextrous digital switch brightness controls
- Built to last, lightweight and rugged steel protective shield, IP67 waterproof with scratch resistant lens coating
- Night vision compatible
- Motion activated on/off function

The Sightmark Mini M-Spec LQD DE is an ideal optic for tactical simulations, competition shooting and home defense. The Mini M-Spec in dark earth features a steel protective shield, making the 2.3 ounce Mini one of the most reliable compact sized optics available. The kit includes a low-profile locking quick detach mount for pistols and shotguns along with a riser mount for AR platform rifles. Use the Mini M-Spec DE in virtually any environment, from daytime to low-light conditions complete with a 3 MOA red dot reticle with added ambidextrous switch controls to benefit both left- and right-handed when adjusting through 10 brightness levels. Mini M-Specs boast a coated and scratch resistant lens, features a low consumption battery life of 300-30,000 hours on a single CR1632, 12-hour auto shut-off and is IP67 rated waterproof, dustproof and shockproof.
