Built for shooting versatility, the Sightmark T-3 and T-5 magnifiers mount directly behind a reflex sight or red dot and provides absolute co-witness. Instantly change the magnification of your close-range optic by using the T-3 or T-5's flip-to-side mount. The magnifier's streamlined, low drag design prevents it from snagging on clothing and equipment. An included LQD mount allows for rapid attaching/detaching in intense shooting situations. The T-3 and T-5's aluminum construction is shockproof up to .308 caliber rifles and provides IP55 water resistant protection. Brightness and resolution are improved from fully multi-coated optics and external windage and elevation adjustments help shooters align the reticle of their red dot/reflex sight to the center of the magnifiers point of view. The Sightmark T-3 and T-5 Magnifiers include flip-to-side LQD mount, adjustment tools and manual.
