

FASTEST, EASIEST, MOST ACCURATE SIGHT-IN SYSTEM

FEATURES

- In-chamber boresight
- Rechargeable
- Auto-activation
- Calibrated for precision
- Durable brass construction
- Saves costs on ammo

.243, .308, 7.62x51 BORESIGHT SPECIFICATIONS

	SM39051
Laser wavelength (nm)	632-650
Output power (mW)	<5
Battery type	internal rechargeable
Battery life (hours)	1
Full recharge time (hours)	1
Range for sighting (yards)	15-100
Dot size (inches @ 100 yards)	2
Operation	auto-activation
Construction	brass

Saving money on ammo and time on zeroing your firearm has never been easier with the Accudot .243 Red Laser Boresight from Sightmark. Now with auto-activation that only consumes power and turns the laser on when the boresight is chambered, Accudots also feature a rechargeable, Lithium-Ion supercapacitor to keep you from buying hard-to-find batteries. A durable brass construction improves chambering and ejection, while an included USB dock allows for on-the-go charging. The Accudot .243 also boasts a calibrated diode to improve accuracy, allowing shooters to get on paper with their first shot. Accudots include recharging dock, USB cable, wall adapter and carrying case.
